KATA PENGANTAR

Penerbitan ini memaparkan statistik Kedudukan Pelaburan Antarabangsa (IIP) Malaysia bagi suku tahun keempat 2023. Data siri masa suku tahunan bagi 2018 hingga 2022 turut dimuatkan di dalam penerbitan ini. Ia disusun berdasarkan syor *International Monetary Fund (IMF)* yang terkandung di dalam *Balance of Payments and International Investment Position Manual, Sixth Edition (BPM6)*.

IIP mengukur aset kewangan dan liabiliti Malaysia termasuk Pelaburan langsung, Pelaburan portfolio, Derivatif kewangan, Pelaburan lain, Aset rizab dan tahap pelaburan asing di Malaysia dan pelaburan Malaysia di luar negeri. Statistik ini boleh digunakan oleh agensi kerajaan, ahli ekonomi, ahli akademik, serta individu bagi tujuan membuat perancangan dan penggubalan dasar, analisis ekonomi, unjuran dan membantu merancang pembangunan perniagaan.

Ringkasan penemuan dan jadual statistik terperinci dipaparkan pada bahagian pertama dan kedua penerbitan ini. Sementara itu, bagi memudahkan lagi kefahaman, aspek teknikal seperti skop, liputan, konsep dan definisi dimuatkan pada bahagian akhir.

Jabatan merakamkan penghargaan atas kerjasama semua pihak dalam membekalkan data yang diperlukan dan menyumbang kepada kejayaan penerbitan ini.

IIP 2023

International Investment Position
Suku Tahun Keempat | *Fourth Quarter*

NOTA TEKNIKAL | TECHNICAL NOTES

NOTA TEKNIKAL

A. PENDAHULUAN

Penerbitan ini menyediakan statistik Kedudukan Pelaburan Antarabangsa (IIP) suku tahunan yang mengukur stok aset kewangan dan liabiliti asing Malaysia kepada negara lain. Penyusunan ini selaras dengan metodologi yang ditetapkan dalam *Balance of Payments Manual and International Investment Position Sixth Edition* (BPM6). Statistik ini menggambarkan pelaburan Malaysia di luar negeri (aset) dan pelaburan asing di Malaysia (liabiliti). Perbezaan di antara aset dengan liabiliti mencerminkan IIP bersih Malaysia. Umumnya, kedudukan bersih tersebut menunjukkan perbandingan di antara apa yang Malaysia miliki dengan yang ia berhutang. Dalam keadaan apabila aset asing melebihi liabiliti, ini menggambarkan ekonomi Malaysia berada pada tahap IIP bersih yang positif (kedudukan aset bersih), dan sebaliknya.

B. SKOP DAN LIPUTAN

Penyusunan IIP Malaysia terdiri daripada dua kategori, iaitu aset dan liabiliti. Aset kewangan dan liabiliti asing dikategorikan kepada lima jenis pelaburan iaitu pelaburan langsung, pelaburan portfolio, derivatif kewangan, pelaburan lain dan aset rizab. Pelaburan ini seterusnya dipecahkan mengikut jenis instrumen (cth. ekuiti & dana pelaburan saham, sekuriti hutang, mata wang & deposit, pinjaman dll.), sektor institusi (cth. bank negara, *deposit-taking corporations*, kerajaan dan sektor-sektor lain) dan tempoh matang kontrak.

Untuk memenuhi keperluan pengguna, pelaburan langsung juga dipersembahkan mengikut prinsip arah aliran seperti disarankan dalam BPM5. Mengikut manual ini, DIA diperoleh daripada perbezaan antara aset pelabur langsung Malaysia dengan liabilitinya, sementara FDI diperoleh daripada perbezaan antara liabiliti enterpris pelaburan langsung Malaysia dengan asetnya.

C. DEFINISI DAN KONSEP

IIP bagi Malaysia merupakan penyusunan statistik aset kewangan dan liabiliti asing Malaysia pada satu titik masa. Aset kewangan di luar negeri terdiri daripada tuntutan ke atas bukan residen dan emas monetari dan SDR yang dipegang oleh BNM. Paras aset dan liabiliti pada suku tahun berkait rapat dengan magnitud transaksi dan penyesuaian lain pada suku tahun tersebut.

Penyata IIP memaparkan perubahan dalam kedudukan aset kewangan dan liabiliti asing yang dicerminkan oleh transaksi kewangan dan faktor bukan transaksi kewangan seperti perubahan harga, perubahan kadar tukaran asing dan perubahan lain dalam tempoh kajian.

Transaksi kewangan merujuk kepada aliran dana kewangan yang menyumbang kepada kenaikan/pengurangan dalam aset/ liabiliti.

Bagi faktor bukan transaksi seperti perubahan harga, kebiasaannya ia berlaku dalam saham syarikat yang disenaraikan di Bursa Malaysia. Manakala perubahan kadar tukaran asing biasanya berlaku hasil daripada aset dan liabiliti asing dinilai pada mata wang selain daripada Ringgit Malaysia di mana IIP disediakan. Perubahan pada kadar di antara mata wang asing dan

Ringgit Malaysia memberi kesan kepada nilai aset atau liabiliti. Di bawah liabiliti, apabila kadar Ringgit Malaysia menyusut berbanding mata wang asing, maka akan memberi kesan positif dari segi perubahan kadar tukaran asing. Sebaliknya, kesan tersebut akan menjadi negatif apabila Ringgit Malaysia meningkat berbanding mata wang asing. Bagi aset pula, kesan terhadap Ringgit Malaysia adalah sebaliknya. Sementara itu, perubahan lain boleh wujud hasil daripada hapus kira, pengelasan semula dan lain-lain.

IIP juga berkait rapat dengan komponen pendapatan pelaburan pada akaun semasa dalam statistik Imbangan Pembayaran. Secara amnya, semakin besar stok aset dan liabiliti asing, semakin besar pendapatan pelaburan terakru pada aset dan liabiliti asing tersebut. IIP sebahagian besarnya juga dapat memberi gambaran tertentu berkenaan hutang bukan ekuiti asing Malaysia.

Konsep residen juga digunakan dalam penyusunan ini yang mana ia selaras dengan penyusunan statistik Imbangan Pembayaran. Residen merujuk kepada syarikat atau institusi yang berada/ beroperasi di Malaysia di mana kepentingan ekonominya berpusat di Malaysia dan individu yang tinggal atau menetap di Malaysia bagi tempoh sekurang-kurangnya satu tahun. Bukan residen merujuk kepada syarikat atau institusi yang tinggal, individu, atau berada/ beroperasi di negara luar Malaysia.

Pelaburan Langsung

Pelaburan langsung merujuk kepada wujudnya hubungan jangka panjang di antara pelabur langsung dengan enterpris pelaburan langsung dan mempunyai kuasa pegangan sekurang-kurangnya 10 peratus dalam pengurusan enterpris tersebut. Pelaburan langsung meliputi semua transaksi di antara pelabur langsung dengan enterpris pelaburan langsung dalam Hubungan Pelaburan Langsung Asing (FDIR). Instrumen kewangan yang diliputi di bawah pelaburan langsung termasuklah ekuiti & dana pelaburan saham dan instrumen hutang (seperti pinjaman antara syarikat dan kredit perdagangan & pendahuluan).

Berdasarkan asas aset dan liabiliti, pelaburan langsung dipersembahkan mengikut aset dan liabiliti kasar. Aset merujuk kepada semua pelaburan di luar negeri bagi kedua-dua pelabur langsung dan enterpris pelaburan langsung di Malaysia, sementara liabiliti merujuk kepada semua pelaburan di Malaysia bagi kedua-dua pelabur langsung dan enterpris pelaburan langsung di luar negeri.

Mengikut asas prinsip arah aliran, DIA diperoleh daripada perbezaan antara aset pelabur langsung Malaysia dengan liabilitinya, sementara FDI diperoleh daripada perbezaan antara liabiliti enterpris pelaburan langsung Malaysia dengan asetnya.

Pelaburan Portfolio

Pelaburan portfolio melibatkan urus niaga antarabangsa dalam ekuiti & dana pelaburan saham (cth. saham) dan sekuriti hutang (cth. bon & nota, sukuk dan instrumen pasaran wang), selain daripadanya termasuk dalam pelaburan langsung dan aset rizab.

Derivatif Kewangan	Instrumen kewangan yang dihubungkan dengan instrumen kewangan lain atau petunjuk atau komoditi, dan mempunyai risiko kewangan tertentu (seperti risiko kadar faedah, risiko mata wang, risiko harga ekuiti & komoditi, risiko kredit dll.) yang boleh diniagakan secara berasingan di pasaran kewangan. Contoh derivatif kewangan ialah opsyen (termasuk waran), niaga hadapan, kontrak hadapan dan swap.
Pelaburan Lain	Merujuk kepada pelaburan selain daripada pelaburan langsung dan pelaburan portfolio. Ia terdiri daripada mata wang & deposit, pinjaman yang dikaitkan dengan pajakan kewangan, kredit perdagangan dan pendahuluan tanpa mengira tempoh pembayaran balik dan akaun lain yang belum terima/ bayar.
Aset Rizab	Aset rizab merujuk kepada tuntutan BNM terhadap bukan residen bagi memenuhi keperluan pembiayaan BOP. Ia terdiri daripada pegangan emas dan pertukaran asing oleh BNM, milikan Hak Pengeluaran Khas dan kedudukan rizab BNM dengan Tabung Kewangan Antarabangsa IMF.
Ekuiti & Dana Pelaburan Saham	Terdiri daripada semua saham dalam syarikat subsidiari dan bersekutu dan sumbangan lain (barangan, perkhidmatan dan sumber lain). Kesemua saham yang dikeluarkan termasuklah saham biasa, saham premium dan saham keutamaan yang mempunyai hak mengundi.
Sekuriti Hutang	Sekuriti hutang termasuk bon, debentur, nota kewangan, nota janji hutang dan lain-lain sekuriti bukan-ekuiti yang boleh diniagakan yang mana biasanya diniagakan (didagangkan) dalam pasaran kewangan yang teratur.

D. PENILAIAN

Semua transaksi dinilai pada harga pasaran. Harga pasaran bermaksud sejumlah wang yang dipersetujui di antara pembeli bagi mendapatkan barangan dan perkhidmatan, daripada penjual. Pertukaran dibuat di antara kedua-dua pihak yang bebas dan atas dasar komersial sahaja. Sekiranya keadaan untuk mewujudkan harga sedemikian tidak berlaku, maka nilai pasaran yang setara, iaitu nilai yang dicatatkan pada buku lembaranimbangan digunakan.

E. SUMBER DATA

IIP disusun berdasarkan beberapa sumber:

Sumber utama	Penyiasatan Kedudukan Pelaburan Antarabangsa, IIP (usaha sama antara DOSM dan BNM).
Sumber sekunder	Data aset rizab dibekalkan oleh BNM.

F. PEMBUNARAN

Sebarang perbezaan pada data yang dilaporkan adalah disebabkan oleh pembundaran.

G. AMALAN DATA AWALAN DAN SEMAKAN

Amalan yang digunakan oleh DOSM bagi keluaran data awalan dan data disemak ialah:

- Data awalan dikeluarkan selepas tujuh minggu selepas suku tahun rujukan;
- Data disemak bagi tahun sebelumnya akan diterbitkan pada suku pertama tahun semasa; dan
- Data akhir akan diterbitkan setahun selepas data disemak diterbitkan.

TECHNICAL NOTES

A. INTRODUCTION

This publication provides quarterly International Investment Position (IIP) statistics that measures the stock of Malaysia's external financial assets and liabilities with the rest of the world. The compilation is in accordance with the methodology set forth in the Balance of Payments Manual and International Investment Position Sixth Edition (BPM6). This statistics portray Malaysia's investment abroad (assets) and foreign investment in Malaysia (liabilities). The difference between the assets and liabilities reflects Malaysia's net IIP. Basically, the net position shows what Malaysia owns in relation to what it owes. Under the circumstances should external assets exceed its liabilities, this indicates that the economy of Malaysia is in a positive net IIP (net assets position), and vice versa.

B. SCOPE AND COVERAGE

The IIP compilation for Malaysia comprises of two broad categories namely assets and liabilities. External financial assets and liabilities are categorised into five types of investment namely: direct investment, portfolio investment, financial derivatives, other investment and reserve assets. The investment is detailed further according to instruments (e.g. equity & investment fund shares, debt securities, currency & deposit, loans, etc.), institutional sector (e.g. central bank, deposit-taking corporations, general government and other sectors) and contractual maturity period.

To facilitate the users need, direct investment is also presented according to directional principle as recommended by BPM5. Under this manual, DIA is derived by netting off the assets of Malaysia's direct investors with its liabilities, while FDI is derived by netting off the liabilities of Malaysia's direct investment enterprises with its assets.

C. CONCEPTS AND DEFINITIONS

The IIP of Malaysia is the statistical compilation representing, at any point in time Malaysia's external financial assets and liabilities. The external financial assets consist of claims on non-residents and of monetary gold and SDRs hold by BNM. The level of the assets and liabilities at the end of the quarter, therefore, is closely related to the magnitude of the transactions and other adjustments for the quarter.

The integrated IIP statement presents the changes in external financial assets and liabilities position are reflected by the financial flows and other nonfinancial flows such as price changes, exchange rate changes and other changes during the period under review.

The financial flows refer to flow of financial funds which contribute to an increase / decrease in asset/ liability.

For non-transactions factors such as price changes, commonly it occurs to the shares of the corporations listed in Bursa Malaysia. Meanwhile exchange rate changes usually occur as a result of the external assets and liabilities being denominated in currencies other than the Ringgit Malaysia in which the IIP is prepared. Changes in the rates between the other currencies and the Ringgit Malaysia consequently affect the values of assets or liabilities.

Under liabilities, when the rate of the Ringgit Malaysia depreciates against the currency in denomination, the impact in terms of the exchange rate changes will be positive. In contrast, the impact will be negative when the Ringgit Malaysia appreciates relative to the currency in denomination. As for assets, the impact on the Ringgit Malaysia will be the reverse. Meanwhile, other changes can take place from write-offs, reclassifications and etc.

IIP is also closely associated with the investment income component of the current account in Balance of Payments statistics. In general, the greater the stocks of the external assets and liabilities, the greater the investment income accruing on these external assets and liabilities. The IIP, to a certain extent, can also provide a view of the external non-equity debts of Malaysia.

The concept of resident also used in this compilation which is in line with the Balance of Payments statistics. A resident is a company or institution located/ operating in Malaysia where its centre of predominant economic interest is in Malaysia and a person who has stayed or lived in Malaysia for at least one year. A non-resident refers to a company or institution that lives in, a person, or is located/ operates in a country outside Malaysia.

Direct Investment

Direct investment refers to the lasting interest which implies the existence of a long-term relationship between the direct investor and the enterprise and obtaining at least 10 per cent of the voting power on the management of the enterprise. Direct investment covers all transactions between direct investors and direct investment enterprises within the Foreign Direct Investment Relationship (FDIR). Financial instruments covered under direct investment include equity & investment fund shares and debt instruments (such as inter-company loans and trade credits & advances).

According to assets and liabilities basis, direct investment is presented according to gross assets and liabilities. Asset refers to all investments abroad by both direct investors and direct investment enterprises in Malaysia, while liabilities refers to all investments in Malaysia by both direct investors and direct investment enterprises abroad.

According to directional basis, DIA is derived by netting off the assets of Malaysia's direct investors with its liabilities, while FDI is derived by netting off the liabilities of Malaysia's direct investment enterprises with its assets.

Portfolio Investment

Portfolio investment involves international transactions in equity & investment fund shares (e.g. shares) and debt securities (e.g. bonds & notes, sukuk and money market instruments), apart from those included in direct investment and reserve assets.

Financial Derivatives

Financial instruments that are linked to another financial instruments or indicators or commodities, and through which specific financial risks (such as rate risks, currency, equity & commodity price risks, credit risks, etc.) can be traded in financial markets in their own rights. Examples of financial derivatives are options (including warrants), futures, forward contracts and swaps.

D. VALUATION

All transactions are valued at market prices. The market prices are defined as amounts of money that the willing buyers pay to acquire goods and services from the willing sellers. The exchanges are made between independent parties and on the basis of commercial considerations. In the absence of conditions that establish such prices, therefore, equivalent market values such as book values posted in the balance sheet are used.

E. DATA SOURCES

IIP are compiled from several sources:

Primary source Survey on International Investment Position, IIP (joint effort between DOSM and BNM).

Secondary source Data on reserve assets are provided by BNM.

F. ROUNDING

Any differences in the aggregated data are due to rounding.
