Announcement

The Department of Statistics Malaysia (DOSM) has launched OpenDOSM NextGen as a medium that provides a catalog of data and visualisations to facilitate users' analysis of various data and can be accessed through <u>https://open.dosm.gov.my</u>.

DOSM will conduct the Agricultural Census in 2024. Please visit <u>https://www.myagricensus.gov.my</u> for more information. The theme is "Agriculture Census, Key to Agricultural Development".

The Government of Malaysia has declared National Statistics Day (MyStats Day) on October 20th each year. MyStats Day theme is "Statistics is the Essence of Life".

The Primary Database (PADU) was launched on 2 January 2024. PADU contains individual and household profiles covering citizens and permanent residents of Malaysia. The main goal of PADU is to ensure that Malaysians are not left behind from the citizen centric initiatives implemented by the Government. Your kind cooperation is requested to register and update PADU by 31 March 2024. Please visit <u>www.padu.gov.my</u> for more information related to PADU or contact the following hotlines:

PREFACE

The monthly Labour Force Report, Malaysia, presents the statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS). The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are used as a vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for December 2023 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events. In addition, annual changes from the same month of the previous year are also reported.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

DATO' SRI DR. MOHD UZIR MAHIDIN Chief Statistician Malaysia

GLOSSARY		
Actively unemployed	:	Persons who were available for work and were actively looking for a job during the reference week.
Category of skills	:	For reporting purposes, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as below:
		Skilled workers:
		1. Managers;
		2. Professionals; and
		3. Technicians and associate professionals.
		Semi-skilled workers:
		4. Clerical support workers;
		5. Services and sales workers;
		6. Skilled agricultural, forestry, livestock, and fishery workers;
		7. Craft and related trades workers; and
		8. Plant and machine operators and assemblers.
		Low-skilled workers:
		9. Elementary occupations.
		Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with an addition of group 0 - Armed forces occupations.
Economic activity	:	Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors namely Agriculture, Mining & quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into sub-sectors.
Employed	:	All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker or unpaid family worker.
Employee	:	A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.
Employer	:	A person who operates a business, a plantation or other trade and employs one or more workers to help him.
Employment-to- population ratio	:	The proportion of the employed population to working-age population.
Inactively unemployed	:	Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and were waiting for the result of job applications.

GLOSSARY

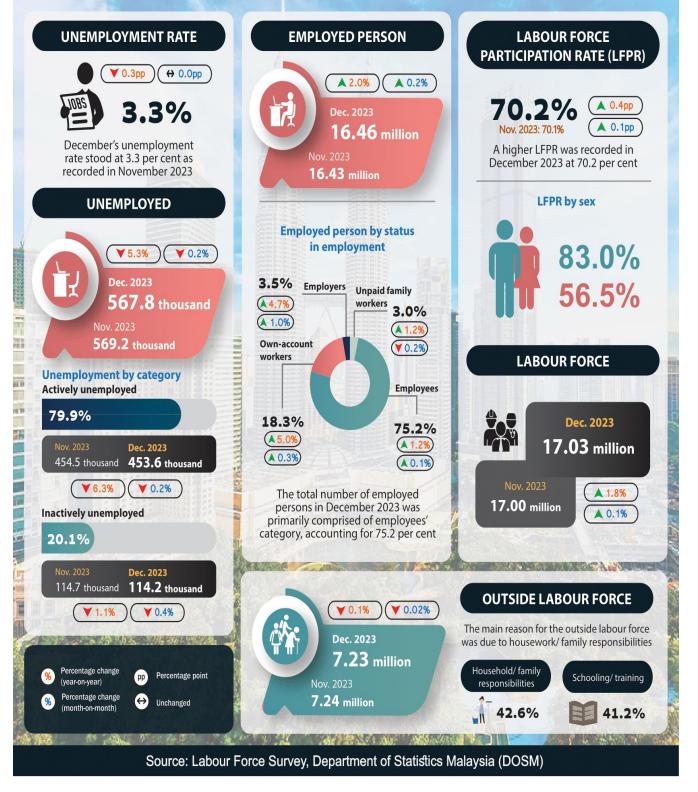

Labour fares	_	Lobour force refere to perculation in the working and group (15 to
Labour force	:	Labour force refers to population in the working age group (15 to 64 years) who are either employed or unemployed
Labour force participation rate	:	The ratio of the labour force to the working-age population, expressed as a percentage.
Outside labour force	:	All persons not classified as employed or unemployed are classified as outside labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.
Own-account worker	:	A person who operates his own farm, business or trade without employing any paid workers in the conduct of his farm, trade or business.
Skill-related underemployment	:	Those with tertiary education and working in the semi-skilled and low-skilled categories.
Time-related underemployment	:	A group of people who were employed less than 30 hours per week during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours per week during the reference week are considered to be in full employment.
Unemployed	:	Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.
Unemployment rate	:	The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.
Unpaid family worker	:	A person who works without pay or wages on a farm, business or trade operated by another member of the family.

LABOUR FORCE MALAYSIA, DECEMBER 2023

MINISTRY OF ECONOMY DEPARTMENT OF STATISTICS MALAYSIA The number of unemployed persons continued to fall to 567.8 thousand persons in December 2023, with an unemployment rate of 3.3 per cent

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite. LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI). The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization (ILO).

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for a job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjusment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

KEY REVIEWS

- The number of employed persons in December 2023 continued to show consistent growth and rose by 0.2 per cent (+26.6 thousand persons), reaching a total of 16.46 million persons (November 2023: 16.43 million persons). In December, the employment-to-population ratio, which indicates the ability of an economy to create employment, remained at 67.8 per cent as in the previous month (November 2023: 67.8%).
- In terms of economic sectors, Services sector continued to record a rise in the number of employed persons, notably in Information & communication; Food & beverage services; and Transportation & storage activities. A similar trend in the number of employed persons was also observed in the Manufacturing, Construction and Mining & quarrying sectors in December 2023. In the meantime, the number of employed persons in the Agriculture sector continued to decline during the month.
- The total number of employed persons in December 2023 was primarily comprised of employees' category, accounting for 75.2 per cent. This category went up by 0.1 per cent (+12.3 thousand persons) to 12.38 million persons (November 2023: 12.37 million persons). Similarly, the rising trend was also seen in the own-account workers category, which increased by 0.3 per cent (+9.5 thousand persons) to 3.0 million persons (November 2023: 2.99 million persons).
 - The number of unemployed persons in December 2023 decreased further, registering a month-on-month decline of 0.2 per cent (-1.4 thousand persons) to 567.8 thousand persons from 569.2 thousand persons last month. The unemployment rate in December stood at 3.3 per cent as recorded in November 2023.
- The number of labour force remained increasing in December 2023, with an addition of 0.1 per cent (+25.1 thousand persons) to register 17.03 million persons (November 2023: 17.0 million persons). Accordingly, a higher labour force participation rate (LFPR) was recorded during the month at 70.2 per cent (November 2023: 70.1%).
- The number of persons outside the labour force during the month registered a decline of 1.1 thousand persons (-0.02%) to 7.23 million persons (November 2023: 7.24 million persons). The main reason for the outside labour force was due to housework/ family responsibilities with 42.6 per cent, followed by schooling/ training (41.2%).
- In line with Malaysia's healthier economic prospects in 2024, supported by increased foreign direct investment (FDI), growing tourism and higher infrastructure spending, the country's labour market may gain a positive impact. The gradual increase in tourism activities will be able to generate economic activity and create a spillover effect on other related sectors of the economy, thus opening up more business opportunities as well as the creation of various job opportunities. In addition, as the country transitions towards a greener economy, it will create new opportunities for businesses to thrive. Hence, there will be a need to build capacity, such as through the availability of highly skilled workers and the use of advanced technology in the production process. Therefore, more highly skilled jobs will be created in the future to meet this need. In line with this, the country's labour market is also expected to remain on a strong and stable growth track in the coming months, corresponding to the current economic developments and technological advances, despite global challenges and changing market trends.

THE LABOUR FORCE SITUATION FURTHER EXPANDED IN DECEMBER 2023, INDICATIVE OF THE STABLE NATION'S ECONOMIC FOUNDATIONS, DRIVEN BY A CONTINUING GROWTH IN ECONOMIC AND SOCIAL ACTIVITIES, DENOTED BY THE POSITIVE EMPLOYMENT TREND AND LOWER UNEMPLOYMENT

As the world moves towards the end of 2023, the global economy remains robust despite persistent inflation challenges. The International Monetary Fund (IMF) stated in The World Economic Outlook Update (January 2024) that the world economy is predicted to improve by 2.9 per cent in 2023 and gain to 3.1 per cent in 2024¹. However, the advance estimate of Malaysia's economy in the fourth quarter of 2023 recorded a higher growth of 3.4 per cent and is projected to grow in the range of 4 per cent in 2023, despite the challenging environment. Therefore, with better growth in 2023 and various initiatives implemented during the year to enhance businesses and employment opportunities, the labour market has improved in 2023.

As a review in 2023, Malaysia's economy continued to sustain a better performance, which led to a resilient labour market situation with a higher number of employed persons and a lower unemployment in the early months of 2023. Thus, the stable recovery of Malaysia's economic growth had opened various prospects and persuaded a larger number of labour forces to be involved in the market. Hence, the requirement for labour demand caused by the higher domestic demand rose to meet the industry's needs.

In March 2023, an optimistic economic position was observed as tourism improved and more people travelled abroad. In conjunction with the reopening of international borders, Malaysia experienced an increase in tourist arrivals, trade and commercial activity, which has led to a robust rebound, particularly in the Services sector. Therefore, the increased tourist influx to Malaysia contributed to the expansion of Malaysia's entrepreneurs as well as job opportunities. Thus, this led to a higher number of employment and low unemployment recorded during the month.

In the meantime, the celebration of Ramadan and Hari Raya Aidilfitri in April 2023 also helped the economy as more bazaars were opened. The Ramadan and Aidilfitri bazaars' operations presented extra opportunities, particularly for starting up new enterprises and expanding existing ones. Therefore, more small businesses took this opportunity to increase their income to support their lives. As economic activity kept flourishing moderately during the month, the labour market remained stable in April 2023, with a continuous increase in the number of employed persons and a further reduction in the number of unemployed. Moreover, the country's economic activity is seen to continue operating at an encouraging pace, which allows business activity to continue to expand and extend to a variety of job opportunities in May 2023. Therefore, the labour force force continued to record steady growth during the month.

During the half year of 2023, the labour market continued to show a positive trend, reflected by the stable country's economic growth. Malaysia has successfully in luring FDI on an annual basis, with an increasing trend due to the availability of good infrastructure for multinational corporations that value efficiency and reliability, such as skilled labour and a stable unified government. The FDI of the first quarter of 2023 had reported a growth by 52.5 per cent year-on-year with RM37 billion compared to RM28 billion in 2022².

Moving to July until September 2023, various festivals and celebrations involved many of the public holidays and school holidays, including the Aidiladha celebration in July, the celebration of the Independent Day of Malaysia in August, followed by the Malaysia Day in September 2023. Thus, the nation become a concentration for foreign and domestic tourists to expend in this country and led to positive performance in Malaysia's trade. Moreover, the trust that global investors place in Malaysia has supported the government in providing multiple opportunities for the corporate sector, Micro, Small and

¹ <u>https://www.imf.org/en/Publications/WEO</u>

² https://www.buletintv3.my/detik-niaga/malaysia-mampu-tarik-pelaburan-walaupun-ringgit-tidak-menentu/

Medium-Sized Enterprises (MSMEs), and improving the labour market in Malaysia across a range of industries, as well as stimulating economic activity and domestic demand. Furthermore, various initiatives have also been implemented by the government to improve the labour market. For example, Malaysia's Prime Minister, YAB Dato' Seri Anwar Ibrahim, has launched the New Industrial Master Plan 2030 (NIMP 2030) to transform the industrial sector by 2030 on 1 September 2023, with an estimated investment of RM95 billion, primarily from the private sector³. This may move the nation towards high-value activities and higher-skilled job opportunities. In addition, the government's efforts to strengthen the labour force, as outlined in policies based on the MADANI Economy framework, include initiatives such as career fairs. Collaborative endeavours between the Social Security Organisation (PERKESO) and various other entities, including the public sector, private sector, and multinational corporations, aim to provide the public with valuable job-seeking information. Moreover, these programmes serve as a platform for employers to identify and connect with a pool of talented potential employees.

Furthermore, the Ministry of Youth and Sports (KBS) has introduced a hostel programme for accommodation at a rate of RM10 per day for youths and job seekers in urban areas. This initiative is targeted for those aged 18 to 40 who are seeking industrial training, actively searching for jobs, or are already employed. It is anticipated that this programme will encourage more young people, especially those from rural areas, to seek employment in urban areas⁴. This initiative not only provides an excellent platform for job seekers and professionals to explore new career opportunities but also underscores Malaysia's dedication to nurturing a skilled and dynamic workforce. This proactive approach is expected to open up more job opportunities for youth and people in the labour market. As a result, the country's labour force position in September 2023 remained in a positive growth trend with a marginal increase in the number of employed persons, while unemployment continued to decrease in line with the current economic developments.

In October and November 2023, the nation's labour force exhibited a promising sign amidst the global geopolitical challenges, including widespread boycotts and a unified global stance against specific major products. This movement notably might affect Malaysia's economic landscape, particularly impacting prominent franchised enterprises and raising concerns about potential job losses and unemployment issues. However, the Minister of Ministry of Human Resources has verified that, as of present, no instances of employee terminations due to the boycott movement have been reported. Amidst these challenges, local businesses have an opportunity to thrive. For example, the Selangor International Business Summit (SIBS) 2023 expo provides a platform for local entrepreneurs to explore larger markets, particularly within the ASEAN region, fostering growth and income opportunities that contribute to the nation's economic advancement⁵. In addition, to address the labour market concern, as outlined in policies based on the MADANI Economy framework, including the career initiatives, the government allocated RM99.7 billion in the 2023 Budget to stimulate the entire workforce ecosystem, including RM18.6 billion specifically targeting empowerment programmes for the B40, M40, women, and youth. Furthermore, the implementation of career carnival initiatives has optimised the utilisation of the workforce and reduced the unemployment rate. The determined efforts have led to positive improvements in the labour market.

For the final month of 2023, the continuous improvement in the labour market remained due to the normalisation of economic activities throughout the year. The steady labour force situation was mainly supported by stable domestic demand, improving tourism activities, the implementation of infrastructure projects, sustained FDI flows and a potential turnaround in external trade that might help sustain job opportunities. Therefore, the labour forces situation further expanded in December 2023, indicative of

³ <u>https://www.nst.com.my/property/2023/10/967564/new-industrial-master-plan-2030-will-drive-industrial-demand-malaysia</u>

https://www.astroawani.com/berita-malaysia/kbs-launches-rm10-day-hostel-youths-job-seekers-437236
 https://www.astroawani.com/berita-malaysia/sibs-2023-peluang-usahawan-tempatan-teroka-pasaran-asean-442676

the stable nation's economic foundations, driven by a continuing growth in economic and social activities, denoted by the positive employment trend and lower unemployment.

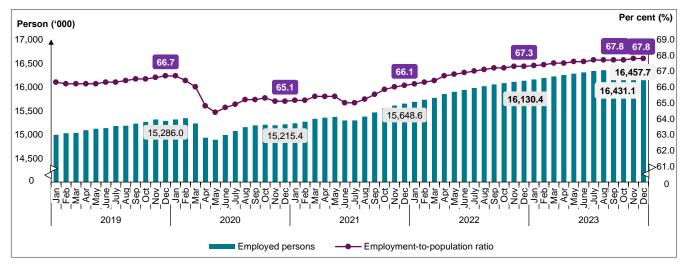

As for the Leading Index (LI) in November 2023, it recorded a decline of 0.2 per cent to 109.8 points as against the same month of the preceding year (November 2022: 110.0 points). On a monthly basis, LI's rebounded by 0.5 per cent during the month, compared to a negative 0.1 per cent in October 2023. The smoothed growth rate of the LI for November 2023 remained below the 100.0 point trend, indicating that Malaysia's economy is foreseen to maintain its moderate growth, supported by the resilient performance of domestic-oriented industries, despite continuing to face the uncertainty of the international market. Meanwhile, the monthly external trade indicators for exports and imports in December 2023 both recorded negative growth of 2.7 cent (November 2023: 3.5%) and negative 2.6 per cent (November 2023: 3.3%), respectively.

The number of employed persons shows consistent growth

The number of **employed persons** in December 2023 continued to show consistent growth and rose by **0.2 per cent (+26.6 thousand persons)**, reaching a total of **16.46 million persons** (November 2023: 16.43 million persons). In terms of seasonally adjusted data, the number of employed persons edged up by 0.2 per cent. Year-on-year, the number of employed persons observed an increase of 2.0 per cent (+327.3 thousand persons) as compared to the same month of the previous year (December 2022: 16.13 million persons).

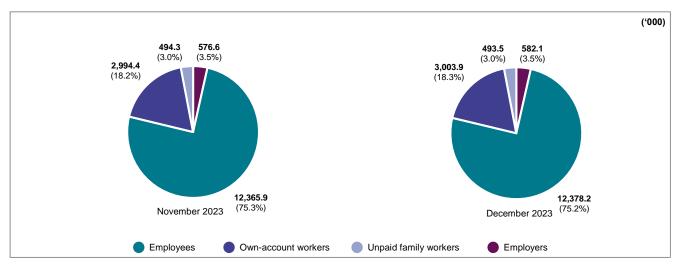

In terms of economic sectors, Services sector continued to record a rise in the number of employed persons, notably in Information & communication; Food & beverage services; and Transportation & storage activities. A similar trend in the number of employed persons was also observed in the Manufacturing, Construction and Mining & quarrying sectors in December 2023. In the meantime, the number of employed persons in the Agriculture sector continued to decline during the month.

In December, the **employment-to-population ratio**, which indicates the ability of an economy to create employment, remained at **67.8 per cent** as in the previous month (November 2023: 67.8%). On a yearly comparison, the ratio saw an increase of 0.5 percentage points as against 67.3 per cent recorded in December 2022 [Chart 1].

The total number of employed persons in December 2023 was primarily comprised of **employees**' category, accounting for **75.2 per cent**. This category went up by **0.1 per cent (+12.3 thousand persons)** to **12.38 million persons** (November 2023: 12.37 million persons). Similarly, the rising trend was also seen in the **own-account workers** category, which increased by **0.3 per cent (+9.5 thousand persons)** to **3.0 million persons** (November 2023: 2.99 million persons). This group consists mostly of daily income earners working as small business operators such as retailers, hawkers, sellers in markets and stalls, as well as smallholders **[Chart 2]**.

In December 2023, the number of employed persons who were temporarily not working went up to **95.8 thousand persons**, with an addition of **22.0 per cent (+17.3 thousand persons)** compared to last month (November 2023: 78.5 thousand persons). The increase was partly due to the year-end holiday, during which most people took a long leave. In a year-on-year comparison, the number increased by 4.6 per cent (+4.2 thousand persons) compared to December 2022 (91.6 thousand persons). This group of persons, who were most likely unable to work, was not classified as unemployed as they had work to return to.

The unemployment rate in December stood at 3.3 per cent

The number of **unemployed persons** in December 2023 decreased further, registering a month-on-month decline of **0.2 per cent (-1.4 thousand persons)** to **567.8 thousand persons** from 569.2 thousand persons last month. The **unemployment rate** in December stood at **3.3 per cent** as recorded in November 2023. In seasonally adjusted estimates, the number of unemployed persons continued to edge down by 0.3 per cent, with 3.4 per cent of the unemployment rate.

On an annual basis, the number of unemployed persons dropped by 5.3 per cent (-31.8 thousand persons) as compared to December 2022 (599.6 thousand persons). Therefore, the unemployment rate declined by 0.3 percentage points from 3.6 per cent in December 2022 [Chart 3].

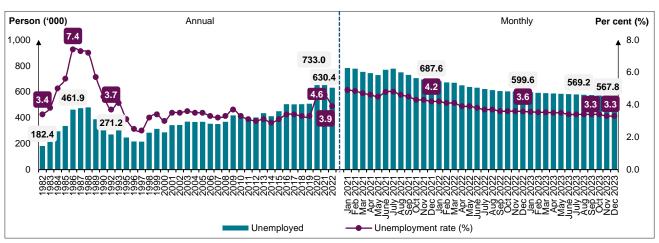

Chart 3: Unemployed persons and unemployment rate, 1982 - 2022 and January 2021 - December 2023

In terms of the unemployment category, the **actively unemployed** or those who were available for work and actively seeking jobs, made up **79.9 per cent** of the total unemployed persons in December 2023. This group recorded a decrease of **0.2 per cent (-0.9 thousand persons)** to **453.6 thousand persons** (November 2023: 454.5 thousand persons). Out of the total of actively unemployed, those who were **unemployed for less than three months** comprised **61.8 per cent**, while those who had been **unemployed for more than a year**⁶ encompassed **6.4 per cent**. Similarly, those who believed that no jobs were available or the **inactively unemployed** registered a month-on-month decline of **0.4 per cent (-0.5 thousand persons)** to **114.2 thousand persons** (November 2023: 114.7 thousand persons) [Chart 4].

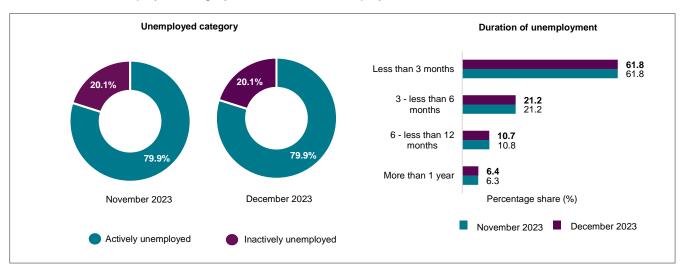

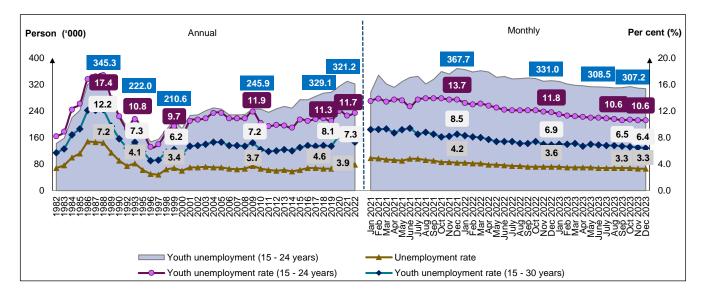

Chart 4: Unemployed category and duration of unemployment, November 2023 and December 2023

In December 2023, the unemployment rate for youth aged **15 to 24 years** stood at **10.6 per cent**, with **307.2 thousand unemployed youths** (November 2023: 10.6%; 308.5 thousand persons). Meanwhile, the unemployment rate for youth aged **15 to 30 years** edged down by **0.1 percentage points** to **6.4 per cent**, registering **432.1 thousand unemployed youths** (November 2023: 6.5%; 432.0 thousand persons) [Chart 5].

⁶ Referring to a person who has been unemployed for one year or longer (Source: KILM: Long-term unemployment) <u>https://www.ilo.org/wcmsp5/groups/public/---dgreports/---stat/documents/publication/wcms_422451.pdf</u>

LFPR rose by 0.1 percentage points to 70.2 per cent in December 2023

The number of **labour force** remained increasing in December 2023, with an addition of **0.1 per cent** (+25.1 thousand persons) to register 17.03 million persons (November 2023: 17.0 million persons). Accordingly, a higher **labour force participation rate (LFPR)** was recorded during the month at 70.2 per cent. In terms of seasonally adjusted terms, the number of labour force increased by 0.1 per cent, recording 70.1 per cent of the LFPR.

Comparing with the same month of the previous year, the number of labour force rose by 1.8 per cent or equivalent to 295.5 thousand persons (December 2022: 16.73 million persons). In terms of rate, the LFPR went up by 0.4 percentage points as compared to December 2022 (69.8%) **[Chart 6]**.

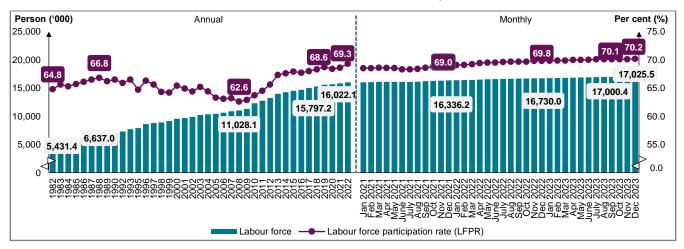

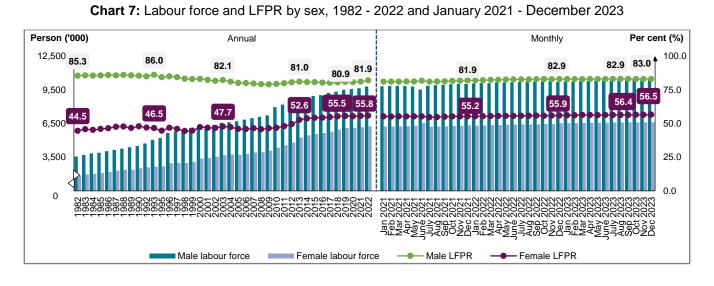

Chart 6: Labour force and LFPR, 1982 - 2022 and January 2021 - December 2023

In terms of labour force by sex, both **male** and **female labour force** continued to rise during the month to record **10.41 million persons** (November 2023: 10.40 million persons) and **6.61 million persons** (November 2023: 6.60 million persons), respectively. Accordingly, both **male** and **female LFPR** ascended by **0.1 percentage points** to register **83.0 per cent** and **56.5 per cent**, respectively.

On a year-on-year basis, both the male and female labour force remained on a positive trend, posting an increase of 2.1 per cent and 1.3 per cent (December 2022: 10.20 million persons; 6.53 million persons), respectively. As for the LFPR, male LFPR showed a rise of 0.1 percentage points from 82.9 per cent, while female LFPR climbed by 0.5 percentage points as compared to 55.9 per cent in December 2022 [Chart 7].

Housework/ family responsibilities were the main reasons for the outside labour force

5

The number of persons **outside the labour force** during the month registered a decline of **1.1 thousand persons (-0.02%)** to **7.23 million persons** (November 2023: 7.24 million persons). Meanwhile, the number of outside labour force decreased by 5.2 thousand persons (-0.1%) year-on-year (December 2022: 7.24 million persons). The main reason for the outside labour force was due to **housework/ family responsibilities** with **42.6 per cent**, followed by **schooling/ training (41.2%)** [Chart 8].

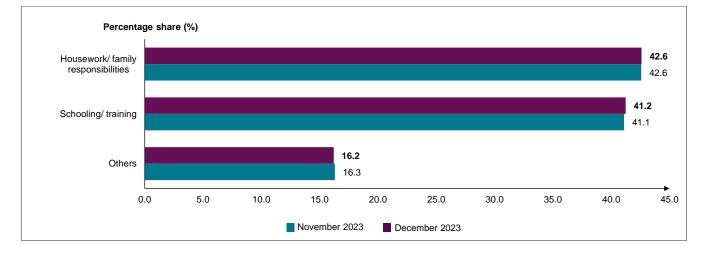

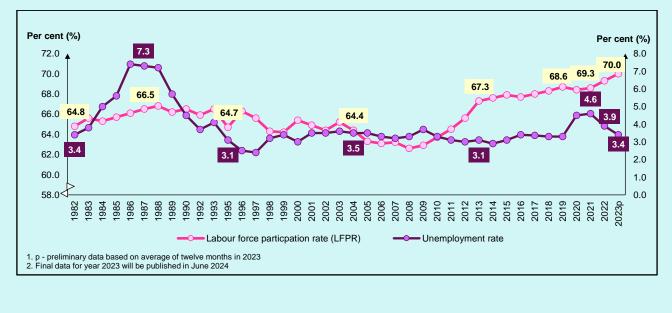

Chart 8: Share of outside labour force by reasons for not seeking work, November 2023 and December 2023

6 LABOUR FORCE PARTICIPATION RATE AND UNEMPLOYMENT RATE IN 2023 (PRELIMINARY)

The preliminary assessment of labour force performance for 2023, based on the monthly average data, indicates an increase in the LFPR. The LFPR for 2023 rose by 0.7 percentage points, registering 70.0 per cent, in contrast to the preceding year of 69.3 per cent in 2022. The favourable labour market landscape in 2023 reflects the promising and improving economic growth throughout the year.

The encouraging economic climate that persisted throughout 2023 raised the need for labour, which in turn led to a rise in job opportunities to keep up with industry demands. As a result, during the course of 2023, the labour force situation became more stable.

Thus, this situation has gradually revived the unemployment rate back to the pre-pandemic level. The unemployment rate in 2023 declined by 0.5 percentage points to register 3.4 per cent compared to the preceding year (2022: 3.9%) [Chart 9].

LOOKING AHEAD

The country's economy is anticipated to be stronger amidst the challenges of global market uncertainties following the country's economic transition towards better growth in 2023 and the implementation of policies planned for 2024. The Malaysian economy is also expected to grow by around 4.5 per cent in 2024, supported by increased foreign direct investment (FDI), growing tourism and higher infrastructure spending⁷.

In addition, the tourism sector is also seen to increase gradually in 2024, as Malaysia has allowed visa-free entry to citizens of China, India and several countries in the Middle East from 1 December 2023 to 31 December 2024, to increase the influx of tourists, which in turn will support the recovery of the tourism industry after the pandemic. The situation is also expected to help mitigate the impact of relatively weak exports. The tourism sector is also seen to be able to generate economic activity and

⁷ https://www.astroawani.com/berita-bisnes/pertumbuhan-ekonomi-malaysia-lebih-baik-sebanyak-45-peratus-tahun-ini-hlb-455791

create a spillover effect on other related sectors of the economy, thus opening up more business opportunities as well as the creation of various job opportunities.

Moreover, according to economists, the MADANI framework will make Malaysia's economy more resilient, competitive and efficient in the future with a strong fiscal position, which will enable the government to plan development programmes more effectively⁸. Additionally, the National Energy Transition Roadmap (NETR) under this framework, which is fundamentally concerned with energy transition, will create new opportunities for businesses to thrive as the country transitions towards a greener economy.

Hence, there will be a need to build capacity, such as through the availability of highly skilled workers and the use of advanced technology in the production process. Therefore, more highly skilled jobs will be created in the future to meet this need. Along with this, the country's labour market is also expected to remain on a strong and stable growth track in the coming months, in line with current economic developments and technological advances, despite global challenges and changing market trends.

Notes:

¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows: A: Agriculture, hunting and forestry

- B: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

³For 2010 - 2021, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

.....

- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional, scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers

' Revised

⁴For year 2011-2019, 2021 and 2022, total includes 'Activities of extraterritorial organizations and bodies'
