### **FEBRUARY 2024**

### **Announcement**

The Department of Statistics Malaysia (DOSM) has launched OpenDOSM NextGen as a medium that provides a catalog of data and visualisations to facilitate users' analysis of various data and can be accessed through <a href="https://open.dosm.gov.my">https://open.dosm.gov.my</a>.

DOSM will conduct the Agricultural Census in 2024. Please visit <a href="https://www.myagricensus.gov.my">https://www.myagricensus.gov.my</a> for more information. The theme is "Agriculture Census, Key to Agricultural Development".

The Government of Malaysia has declared National Statistics Day (MyStats Day) on October 20th each year. MyStats Day theme is "Statistics is the Essence of Life".

### **PREFACE**

The monthly Labour Force Report, Malaysia, presents the statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS). The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are used as a vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for February 2024 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events. In addition, annual changes from the same month of the previous year are also reported.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

DATO' SRI DR. MOHD UZIR MAHIDIN

Chief Statistician Malaysia

### **GLOSSARY**

Actively unemployed

Persons who were available for work and were actively looking for a job during the reference week.

Category of skills

For reporting purposes, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as below:

### Skilled workers:

- 1. Managers:
- 2. Professionals; and
- 3. Technicians and associate professionals.

### Semi-skilled workers:

- 4. Clerical support workers;
- 5. Services and sales workers:
- 6. Skilled agricultural, forestry, livestock, and fishery workers;
- 7. Craft and related trades workers; and
- 8. Plant and machine operators and assemblers.

### Low-skilled workers:

9. Elementary occupations.

Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with an addition of group 0 - Armed forces occupations.

Economic activity

Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors namely Agriculture, Mining & quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into sub-sectors.

**Employed** 

All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker or unpaid family worker.

**Employee** 

A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.

**Employer** 

A person who operates a business, a plantation or other trade and employs one or more workers to help him.

Employment-topopulation ratio

The proportion of the employed population to working-age population.

Inactively unemployed

Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and were waiting for the result of job applications.

### **GLOSSARY**

Labour force	:	Labour force refers to population in the working age group (15 to 64 years) who are either employed or unemployed
Labour force participation rate	:	The ratio of the labour force to the working-age population, expressed as a percentage.
Outside labour force	Ξ	All persons not classified as employed or unemployed are classified as outside labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.
Own-account worker	:	A person who operates his own farm, business or trade without employing any paid workers in the conduct of his farm, trade or business.
Skill-related underemployment	:	Those with tertiary education and working in the semi-skilled and low-skilled categories.
Time-related underemployment	:	A group of people who were employed less than 30 hours per week during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours per week during the reference week are considered to be in full employment.
Unemployed	:	Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.
Unemployment rate	:	The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.
Unpaid family worker	:	A person who works without pay or wages on a farm, business or trade operated by another member of the family.

### **CONCEPTS AND DEFINITIONS**

### What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

The survey population comprises persons who excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI)

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force

#### **LABOUR FORCE**

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

#### **EMPLOYED**

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

#### UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- · Classified into two groups which are actively and inactively unemployed.

#### **OUTSIDE LABOUR FORCE**

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for a job.

#### UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

### LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

#### SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjusment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

### **KEY REVIEWS**

- The number of **employed persons** remained increasing in February 2024, with a month-on-month rise of **0.2 per cent (+24.9 thousand persons)** to **16.51 million persons** (January 2024: 16.48 million persons). The **employment-to-population ratio**, which implies the economy's ability to create employment, stood at **67.9 per cent** as of January 2024.
- In terms of the economic sector, the Services sector continued to register an increase in the number of employed persons, particularly in the Wholesale & retail trade; Food & beverage services; and Transportation & storage activities. The Manufacturing, Construction, Mining & quarrying and Agriculture sectors also saw a rise in the number of employed persons in February 2024.
- Out of the total employed persons in February 2024, **75.2 per cent** were in the **employees'** category, which recorded a slight increase of **0.1 per cent (+13.4 thousand persons)** to **12.41 million persons** (January 2024: 12.39 million persons). Likewise, the **own-account** workers category was on an upward trend, rose by **0.3 per cent (+9.3 thousand persons)** to register **3.02 million persons** from 3.01 million persons in January 2024.
- The number of **unemployed persons** during the month continued to be on a downtrend, with a marginal decrease of **0.1 per cent (-0.3 thousand persons)** to **567.0 thousand persons** (January 2024: 567.3 thousand persons), registering a **3.3 per cent unemployment rate** as in the prior month.
- The number of **labour force** during the month continued to record a month-on-month increase, with an addition of **0.1 per cent (+24.6 thousand persons)** to **17.07 million persons** (January 2024: 17.05 million persons). February's **labour force participation rate (LFPR)** stood at **70.2 per cent** as recorded in the preceding month.
- There was a slight decrease of **0.01 per cent (-0.7 thousand persons)** recorded in the number of persons **outside the labour force** in February 2024, totalling **7.23 million persons** (January 2024: 7.23 million persons). The main reason for being outside the labour force was due to **housework/ family responsibilities**, comprising **42.5 per cent**, followed by **schooling/training** reasons at **41.0 per cent**.
- In line with the stable country's economic situation, most of the economic sectors are anticipated to expand in 2024, with the Services and Manufacturing sectors set to be the key drivers of overall growth. In addition, rising demand for professionals in business and administration services was observed as more firms launched e-commerce platforms, used social media for marketing, explored data analytics for efficiency, and adopted automation and digital systems. Robust domestic demand, on the back of resilient household spending during the upcoming festive season, is also expected to support the hiring activities. Therefore, the labour market position is foreseen to continue to grow in the following months, supported by continued demand for employment towards a better economy.

### THE COUNTRY'S ECONOMY AND LABOUR MARKET KEPT FLOURISHING IN FEBRUARY 2024, LEADING TO A CONTINUOUS INCREASE IN THE NUMBER OF LABOUR FORCE **DURING THE MONTH**

Malaysia's economy was observed to be healthier in February 2024, supported by encouraging economic activity and the continued recovery of the labour market, despite the challenging external headwinds. As the country's labour market remained stable, the women's labour force participation rate surpassed pre-COVID-19 levels and continues to trend upwards. New technologies also facilitate the rise of flexible working arrangements, which encourage higher labour force participation, particularly among females, and promote greater labour mobility.

According to Bank Negara Malaysia (BNM) Governor, Datuk Shaik Abdul Rasheed Abdul Ghaffour stated that the recovery in the tourism sector with higher tourist arrivals in 2024 may exceed pre-pandemic levels of 26 million people<sup>1</sup>. The recovery in tourism activity had boosted a better economy and improved the stability of the labour market as more business opportunities occurred through the tourism-related industries.

Moreover, the Malaysian labour force also led to a stable recovery of the country's economy, which was supported by the robust expansion of Malaysia's exports. According to Public Investment Bank Bhd. (PIVB), Malaysia as major electrical and electronic (E&E) suppliers stand to benefit significantly from the projected recovery in the global semiconductor market in 2024, as exports of E&E products constitute more than 40 per cent of the country's total gross exports<sup>2</sup>. In addition, the continued operation in E&E exports had led to a gain in increasing job opportunities to fulfil labour market demand as well as Malaysia's economic. A higher demand for E&E exports had encouraged labour participation in the market. As the country's economy and labour market kept flourishing during the month, this led to a continuous increase in the number of labour in February 2024. Therefore, the number of employed persons remained on a positive trend, while the number of unemployed persons further decreased.

In the meantime, Malaysia's Leading Index (LI) rose by 3.2 per cent year-on-year, to 112.0 points in January 2024 (January 2023: 108.5 points). The monthly LI also increased by 1.6 per cent in January 2024, as against 0.3 per cent recorded in the previous month. Furthermore, based on the smoothed long-term trend in January 2024, the LI remained below the trend of 100.0 points trend. Although it is still below the trend, the surge in the LI performance anticipates more encouraging economic growth in the near term, following the expectation of a rebound in external trade in 2024. Meanwhile, the monthly external trade indicators for February 2024 for exports and imports, both registered month-on-month declines of -9.1 per cent (January 2024: 3.4%) and -10.5 per cent (January 2024: 5.3%), respectively.

### The number of employed persons remained increasing in February 2024

The number of employed persons remained increasing in February 2024, with a month-on-month rise of **0.2 per cent (+24.9 thousand persons)** to **16.51 million persons** (January 2024: 16.48 million persons). Seasonally adjusted data also showed an increase of 0.2 per cent in the number of employed persons. Year-on-year, the number of employed persons rose by 2.0 per cent or equivalent to 318.6 thousand persons, as compared to 16.19 million persons in the same month, previous year.

https://www.hmetro.com.my/utama/2024/02/1062630/paras-semasa-ringgit-tak-cerminkan-prospek-positif-ekonomi-malaysia-gabenor

https://www.sinarharian.com.my/article/650747/bisnes/perdagangan-luar-malaysia-meningkat-semula-pada-2024---penganalisis#google vignette

In terms of the economic sector, the Services sector continued to register an increase in the number of employed persons, particularly in the Wholesale & retail trade; Food & beverage services; and Transportation & storage activities. The Manufacturing, Construction, Mining & quarrying and Agriculture sectors also saw a rise in the number of employed persons in February 2024.

The **employment-to-population ratio**, which implies the economy's ability to create employment, stood at **67.9 per cent** as of January 2024. This ratio saw a growth of 0.5 percentage points from 67.4 per cent in February 2023 **[Chart 1]**.

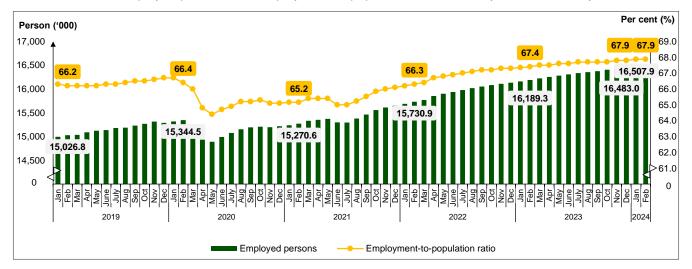

Chart 1: Employed persons and employment-to-population ratio, January 2019 - February 2024

Out of the total employed persons in February 2024, **75.2 per cent** were in the **employees'** category, which recorded a slight increase of **0.1 per cent (+13.4 thousand persons)** to **12.41 million persons** (January 2024: 12.39 million persons). Likewise, the **own-account workers** category was on an upward trend, rose by **0.3 per cent (+9.3 thousand persons)** to register **3.02 million persons** from 3.01 million persons in January 2024. This group consists mostly of daily income earners working as small business operations such as retailers, hawkers, sellers in market, as well as smallholders [Chart 2].

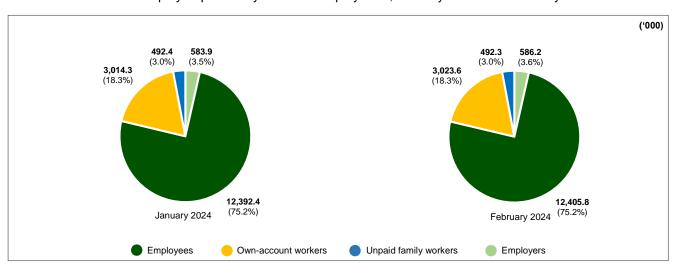

Chart 2: Employed person by status in employment, January 2024 and February 2024

In February 2024, the total of **employed persons temporarily not working** declined by **1.4 per cent (-1.2 thousand persons)** to **84.9 thousand persons** (January 2024: 86.1 thousand persons). On the contrary, there was a 6.1 per cent increase (+4.9 thousand persons) from 80.1 thousand persons in

February 2023. This group of persons, who were likely unable to work temporarily, were not classified as unemployed as they still had work to return to.

### Unemployment rate in February 2024 was unchanged at 3.3 per cent

The number of **unemployed persons** during the month continued to be on a downtrend, with a marginal decrease of 0.1 per cent (-0.3 thousand persons) to 567.0 thousand persons (January 2024: 567.3 thousand persons), registering a 3.3 per cent unemployment rate as in the prior month. In the meantime, on seasonally adjusted terms, the number of unemployed dropped by 0.4 per cent, recording 3.3 per cent of the unemployment rate.

Similarly, the number of unemployed persons reduced further by 4.2 per cent (-24.9 thousand persons) as against the same month of the previous year (February 2023: 591.9 thousand persons). The unemployment rate also declined by 0.2 percentage points as compared to 3.5 per cent in February 2023 [Chart 3].

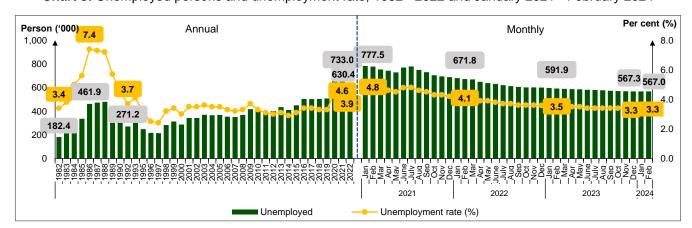

Chart 3: Unemployed persons and unemployment rate, 1982 - 2022 and January 2021 - February 2024

Looking at the unemployment category, the actively unemployed or those who were available for work and were actively seeking jobs, comprised 79.8 per cent of the total unemployed persons in February 2024. This group recorded a marginal decrease of 0.04 per cent (-0.2 thousand persons) to **452.4 thousand persons** (January 2024: 452.5 thousand persons). From the total actively unemployed, 61.6 per cent were those who were unemployed for less than three months, while 6.7 per cent were those who were in long-term unemployment for more than a year<sup>3</sup>. On the other hand, those who believed that there were no jobs available or were inactively unemployed edged down by 0.1 per cent (-0.1 thousand persons) to 114.6 thousand persons (January 2024: 114.7 thousand persons) [Chart 4].

<sup>&</sup>lt;sup>3</sup> Referring to a person who has been unemployed for one year or longer (Source: KILM: Long-term unemployment) https://www.ilo.org/wcmsp5/groups/public/---dgreports/---stat/documents/publication/wcms 422451.pdf

**Unemployed category Duration of unemployment** Less than 3 months 20.2% 3 - less than 6 months 6 - less than 12 **10.9** 11.0 months 79.8% 79.8% More than 1 year February 2024 Percentage share (%) January 2024 January 2024 February 2024 Actively unemployed Inactively unemployed

Chart 4: Unemployed category and duration of unemployment, January 2024 and February 2024

The unemployment rate for youth aged 15 to 24 years during the month remained unchanged at 10.6 per cent in February 2024, with 306.6 thousand unemployed youths (January 2024: 10.6%; 306.8 thousand persons). Meanwhile, the unemployment rate for youth aged 15 to 30 years declined by 0.1 percentage points to 6.6 per cent, registering the number of unemployed youths at **434.8 thousand persons** (January 2024: 6.7%; 439.7 thousand persons) [Chart 5].

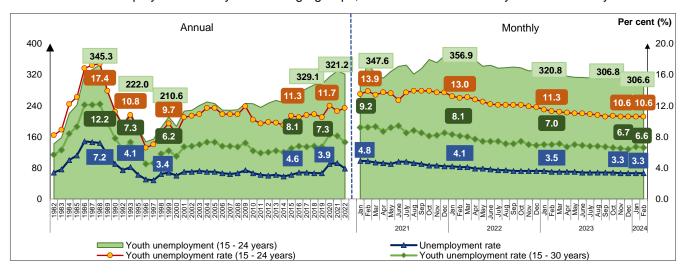

Chart 5: Unemployment rate by selected age groups, 1982 - 2022 and January 2021 - February 2024

### February's LFPR stood at 70.2 per cent

The number of labour force during the month continued to record a month-on-month increase, with an addition of 0.1 per cent (+24.6 thousand persons) to 17.07 million persons (January 2024: 17.05 million persons). February's labour force participation rate (LFPR) stood at 70.2 per cent as recorded in the preceding month. By seasonally adjusted estimates, the number of labour force rose by 0.2 per cent, registering an LFPR of 70.2 per cent.

By comparing with twelve months earlier, the number of labour force remained stable, with an increase of 1.8 per cent (+293.7 thousand persons) as compared to February 2023 (16.78 million persons). Accordingly, the LFPR edged up by 0.3 percentage points from the 69.9 per cent registered in February last year [Chart 6].

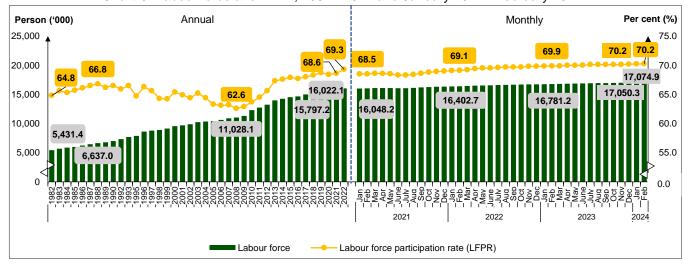

Chart 6: Labour force and LFPR, 1982 - 2022 and January 2021 - February 2024

In February 2024, the male labour force continued to rise during the month to record 10.44 million persons (January 2024: 10.43 million persons). On the same note, the female labour force also increased to 6.63 million persons (January 2024: 6.62 million persons). In terms of LFPR, both male and female LFPR were unchanged, with males at 83.1 per cent and the females at **56.5 per cent**, respectively, as in last month.

On a year-on-year basis, both the male and female labour force remained on an upward trend, recording an increase of 2.0 per cent and 1.4 per cent (February 2023: 10.24 million persons; 6.54 million persons), respectively. Accordingly, male LFPR escalated by 0.2 percentage points (February 2023: 82.9%), while female LFPR rose by 0.5 percentage points as compared to 56.0 per cent in February 2023. [Chart 7].

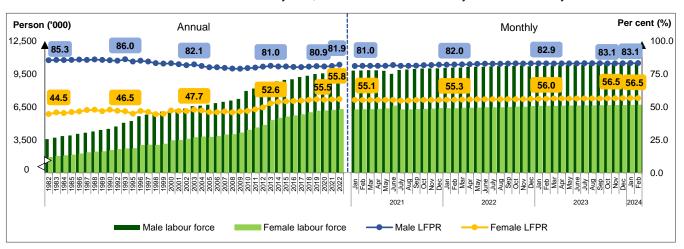

Chart 7: Labour force and LFPR by sex, 1982 - 2022 and January 2021 - February 2024

There was a slight decrease of 0.01 per cent (-0.7 thousand persons) recorded in the number of persons outside the labour force in February 2024, totalling 7.23 million persons (January 2024: 7.23 million persons). Year-on-year, the number of persons outside the labour force decreased by 0.1 per cent from 7.24 million persons in February 2023. The main reason for being outside the labour force was due to housework/ family responsibilities, comprising 42.5 per cent, followed by schooling/ training reasons at 41.0 per cent [Chart 8].

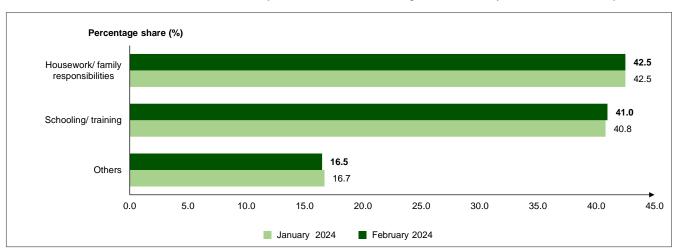

Chart 8: Share of outside labour force by reasons for not seeking work, January 2024 and February 2024

### **LOOKING AHEAD**

According to Bank Negara Malaysia (BNM), the country's economy is expected to expand in the range of four to five per cent in 2024, supported by domestic demand growth and increased external demand, although the global environment remains uncertain<sup>4</sup>. The country's tourism sector is anticipated to benefit, with an expected tourist arrival of around 27.3 million in 2024, as the global tourism sector is projected to recover to pre-pandemic levels.

Malaysia's economic growth prospects are also seen as capable of facing unprecedented challenges following the country's strong economic foundations, including positive spillovers from an increasing global technology cycle, stronger tourism activities, and rapid implementation of existing and new investment projects. In line with the stable country's economic situation, most of the economic sectors are anticipated to expand in 2024, with the Services and Manufacturing sectors set to be the key drivers of overall growth. In addition, rising demand for professionals in business and administration services was observed as more firms launched e-commerce platforms, used social media for marketing, explored data analytics for efficiency, and adopted automation and digital systems. Robust domestic demand, on the back of resilient household spending during the upcoming festive season, is also expected to support the hiring activities. Therefore, the labour market position is foreseen to continue to grow in the following months, supported by continued demand for employment towards a better economy.

<sup>4</sup> https://www.bharian.com.my/bisnes/lain-lain/2024/03/1225921/ekonomi-malaysia-ada-ruang-untuk-terus-berkembang-tahun-ini

In addition, the National Energy Efficiency Action Plan 2.0 (NEEAP 2.0), which is being drafted by the Government is seen as capable of creating more jobs, business potential and investment to benefit the country and the people<sup>5</sup>. In line with the execution of the National Energy Transition Roadmap (NETR), sustainable economic transformation will be able to generate new sources of growth, create business opportunities and increase trade potential. The implementation of the various initiatives will also open up more business opportunities and new economic prospects for all parties, including Micro, Small and Medium Enterprises (MSMEs), especially Bumiputera entrepreneurs. Thus, the country's labour market landscape in the future is also foretold to remain resilient in line with the implementation of various initiatives from the new policy framework that is being organised.

Notes:

<sup>1</sup>For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

<sup>2</sup>For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
- B: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

- <sup>3</sup>For 2010 2021, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:
- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional, scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers

<sup>4</sup>For year 2011-2019, 2021 and 2022, total includes 'Activities of extraterritorial organizations and bodies'

Notes:

<sup>1</sup>For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

<sup>2</sup>For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
- B: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

- <sup>3</sup>For 2010 2021, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:
- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional, scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers

<sup>4</sup>For year 2011-2019, 2021 and 2022, total includes 'Activities of extraterritorial organizations and bodies'
