## Announcement

The Department of Statistics Malaysia (DOSM) has launched OpenDOSM NextGen as a medium that provides a catalog of data and visualisations to facilitate users' analysis of various data and can be accessed through <u>https://open.dosm.gov.my</u>.

DOSM will conduct the Agricultural Census in 2024. Please visit <u>https://www.myagricensus.gov.my</u> for more information. The theme is "Agriculture Census, Key to Agricultural Development".

The Government of Malaysia has declared National Statistics Day (MyStats Day) on October 20th each year. MyStats Day theme is "Statistics is the Essence of Life". DOSM commemorates its 75th Diamond Jubilee in 2024.

## PREFACE

The monthly Labour Force Report, Malaysia, presents the statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS). The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are used as a vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for May 2024 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events. In addition, annual changes from the same month of the previous year are also reported.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

DATO' SRI DR. MOHD UZIR MAHIDIN

Chief Statistician Malaysia

## GLOSSARY Persons who were available for work and were actively looking for Actively unemployed 2 a job during the reference week. Category of skills For reporting purposes, the category of occupation is regrouped 2 into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as below: Skilled workers: 1. Managers; 2. Professionals; and 3. Technicians and associate professionals. Semi-skilled workers: 4. Clerical support workers; Services and sales workers; 6. Skilled agricultural, forestry, livestock, and fishery workers; 7. Craft and related trades workers; and 8. Plant and machine operators and assemblers. Low-skilled workers: 9. Elementary occupations. Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with an addition of group 0 - Armed forces occupations. Economic activity Classification of industries according to the Malaysia Standard : Industrial Classification (MSIC) 2008 version 1.0 into five main sectors namely Agriculture, Mining & quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into sub-sectors. Employed All persons who, at any time during the reference week worked at 2 least one hour for pay, profit or family gain either as an employer, employee, own-account worker or unpaid family worker. Employee A person who works for a public or private employer and receives 2 regular remuneration in wages, salary, commission, tips or payment in kind. A person who operates a business, a plantation or other trade and Employer 2 employs one or more workers to help him. Employment-to-The proportion of the employed population to working-age : population ratio population. Inactively unemployed Did not look for work because they believed no work was available : or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and

were waiting for the result of job applications.

## GLOSSARY

Labour force	:	Labour force refers to population in the working age group (15 to 64 years) who are either employed or unemployed
Labour force participation rate	:	The ratio of the labour force to the working-age population, expressed as a percentage.
Outside labour force	:	All persons not classified as employed or unemployed are classified as outside labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.
Own-account worker	:	A person who operates his own farm, business or trade without employing any paid workers in the conduct of his farm, trade or business.
Skill-related underemployment	:	Those with tertiary education and working in the semi-skilled and low-skilled categories.
Time-related underemployment	:	A group of people who were employed less than 30 hours per week during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours per week during the reference week are considered to be in full employment.
Unemployed	:	Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.
Unemployment rate	:	The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.
Unpaid family worker	:	A person who works without pay or wages on a farm, business or trade operated by another member of the family.

MINISTRY OF ECONOMY DEPARTMENT OF STATISTICS MALAYSI

## **CONCEPTS AND DEFINITIONS**

## ) What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite. LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI). The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization (ILO).

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

#### LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

#### EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

#### UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

#### OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for job.

#### UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

#### LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

#### SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjusment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

## **KEY REVIEWS**

- In May 2024, the number of employed persons continued in a positive trend, with a rise of 0.1 per cent (+24.1 thousand persons) month-on-month to 16.58 million persons compared to the previous month (April 2024: 16.56 million persons). During the month, the employment-to-population ratio, which indicates the ability of the economy to create employment, stood at 68.0 per cent as recorded last month.
- In terms of economic sector, nearly two-thirds of the employed persons were concentrated in the Services sector, which continued to show an uptrend, particularly in the Wholesales & retail trade, Food & beverage services and Information & communication activities. On the same note, the Manufacturing, Construction, Mining & quarrying and Agriculture sectors also recorded a rise in employment.
- The majority of employed persons in May 2024 were in the employees' category, comprising 75.1 per cent. This category went up by 0.1 per cent (+14.3 thousand persons) to 12.44 million persons (April 2024: 12.43 million persons). Similarly, the own-account workers category was on an increasing trend, with an addition of 0.3 per cent (+8.7 thousand persons) to 3.05 million persons (April 2024: 3.04 million persons).
- The number of unemployed persons fell slightly by 0.1 per cent (-0.3 thousand persons) from 566.4 thousand persons in April 2024 to 566.1 thousand persons in May 2024. The unemployment rate during the month remained unchanged at 3.3 per cent.
- The number of labour force in May 2024 strengthened further by 0.1 per cent (+23.8 thousand persons) to record 17.15 million persons (April 2024: 17.12 million persons). May's labour force participation rate remained at 70.3 per cent, as recorded last month.
- The number of persons outside the labour force in May 2024 posted a marginal decrease of 0.003 per cent (-0.2 thousand persons) to 7.23 million persons (April 2024: 7.23 million persons). The major composition of the outside labour force was housework/ family responsibilities, accounting for 42.7 per cent, followed by the schooling/ training category (41.4%).
- As economic and business activities continue to flourish, it has contributed to the creation of more jobs and income opportunities in the economy, which will encourage more labour participation in the market. In addition, the performance of the country's leading index also continued to improve, signalling that the Malaysian economy is expected to experience sustained growth in the near term. Therefore, the labour market is expected to remain on a stable path in the upcoming months, backed by favourable economic growth, a growing domestic economic position, as well as the recovery of the external sector.

## THE LABOUR FORCE POSITION FURTHER STRENGTHENED IN MAY 2024 IN RELATION TO THE ENCOURAGING ECONOMIC AND LABOUR MARKET SITUATION

Improvements in the Manufacturing sector and the labour market, controlled inflation rates, and strong trade performance are among the factors contributing to the positive development of the Malaysian economy during the current period. Malaysia's economy is also seen to be in a better growth trend, which makes the country one of the most attractive destinations for investment purposes. The continued development of economic activity, driven by strong domestic demand, contributed to a continued increase in employment.

In addition, the increasing tourism activity during the month and its positive spillover effects on tourism-related industries such as Wholesale and retail trade, Food and beverages, Accommodation and the implementation of national projects are also seen to benefit the Malaysian labour market in terms of labour demand and supply.

Therefore, many companies and businesses from various sectors continued to expand, which positively impacted the local economy and further boosted the labour market in May 2024. The opening of new factories, such as in Perak, during the month has created 200 new job opportunities and has benefitted the local people<sup>1</sup>. The requirement for manpower is important to optimise the utilisation of the firm's operations. Thus, several vacancies have helped potential job seekers grab the opportunity to fulfil the firm's needs. In relation to the encouraging economic and labour market situation in May 2024, the labour force position further strengthened during the month, with a continuous increase in the number of employed persons, while the unemployed persons was much lower.

Additionally, the Leading Index (LI) which indicates the direction of the Malaysian economy, continued to increase 4.2 per cent to 113.1 points in April 2024 (April 2023: 108.4 points). As for the LI's monthly performance, the monthly LI rebounded 0.8 per cent in April 2024, compared to a negative 0.5 per cent in March 2024. Looking at the smoothed long-term trend in April 2024, the LI remained above the 100.0 points, reflecting continued economic growth in the coming months supported by robust domestic demand and a sustainable expansion of the Manufacturing and Services sectors. In the meantime, compared to April 2024, the monthly external trade indicators in May 2024 for exports and imports both recorded a month-on-month increase of 11.8 per cent (April 2024: -10.8%) and 10.4 per cent (April 2024: -7.7%), respectively.

## The number of employed persons remained in a positive trend in May 2024

In May 2024, the number of **employed persons** continued in a positive trend, with a rise of **0.1 per cent** (+24.1 thousand persons) month-on-month to **16.58 million persons** compared to the previous month (April 2024: 16.56 million persons). In terms of seasonally adjusted estimates, the number of employed persons rose by 0.2 per cent. Compared to one year earlier, the number of employed persons went up by 1.8 per cent or equivalent to 300.4 thousand persons as against the same month of the previous year (May 2023: 16.28 million persons).

In terms of economic sector, nearly two-thirds of the employed persons were concentrated in the Services sector, which continued to show an uptrend, particularly in the Wholesales & retail trade, Food & beverage services and Information & communication activities. On the same note, the Manufacturing, Construction, Mining & quarrying and Agriculture sectors also recorded a rise in employment.

<sup>&</sup>lt;sup>1</sup> https://www.perak.gov.my/index.php/en/berita-utama-en/3118-perak-lokasi-kedua-pembukaan-kilang-smart-paint-manufacturing-sdn-bhd-9-May-2024

During the month, the **employment-to-population ratio**, which indicates the ability of the economy to create employment, stood at **68.0 per cent** as recorded last month. Accordingly, this ratio rose by 0.4 percentage points from 67.6 per cent in May 2023 [Chart 1].

The majority of employed persons in May 2024 were in the **employees**' category, comprising **75.1 per cent**. This category went up by **0.1 per cent (+14.3 thousand persons)** to **12.44 million persons** (April 2024: 12.43 million persons). Similarly, the **own-account workers** category was on an increasing trend, with an addition of **0.3 per cent (+8.7 thousand persons)** to **3.05 million persons** (April 2024: 3.04 million persons). This group mainly consists of daily income earners working as small business operators, such as retailers, hawkers and sellers in the market, as well as smallholders **[Chart 2]**.

The number of **employed persons who were temporarily not working** went down by **1.7 per cent** (-1.4 thousand persons) to **81.0 thousand persons** in May 2024 compared to the previous month (April 2024: 82.4 thousand persons). Year-on-year, the number decreased by 1.1 per cent (-0.9 thousand persons) from 81.9 thousand persons recorded in May 2023. This group of persons, who were most likely unable to work temporarily, were not classified as unemployed as they still had work to return to.

## The unemployment rate remained unchanged at 3.3 per cent in May 2024

The number of **unemployed persons** fell slightly by **0.1 per cent (-0.3 thousand persons)** from 566.4 thousand persons in April 2024 to **566.1 thousand persons** in May 2024. The **unemployment rate** during the month remained unchanged at **3.3 per cent**. Based on seasonally adjusted terms, the number of unemployed persons decreased by 0.3 per cent, resulting in a 3.3 per cent unemployment rate.

Year-on-year, the number of unemployed persons was also on a declining trend, with a decrease of 3.2 per cent (-18.5 thousand persons) as compared to 584.6 thousand persons in May 2023. Subsequently, the unemployment rate decreased by 0.2 percentage points from the 3.5 per cent registered in the same month last year **[Chart 3]**.

Chart 3: Unemployed persons and unemployment rate, 1982 - 2022 and January 2021 - May 2024

By unemployment category, **79.9 per cent** of the total unemployed persons in May 2024 were those who were actively seeking jobs or the **actively unemployed**. This category rose by **0.1 per cent** (+0.6 thousand persons) to 452.0 thousand persons (April 2024: 451.4 thousand persons). Among the actively unemployed, **61.5 per cent** were those who were **unemployed for less than three** months, while those who had been unemployed for more than a year<sup>2</sup> comprised **6.8 per cent**. Meanwhile, the **inactively unemployed** or those who believed that no jobs were available, decreased further with a reduction of **0.8 per cent (-0.9 thousand persons)** to record **114.0 thousand persons** (April 2024: 115.0 thousand persons) **[Chart 4]**.

<sup>&</sup>lt;sup>2</sup> Referring to a person who has been unemployed for one year or longer (Source: KILM: Long-term unemployment) <u>https://www.ilo.org/wcmsp5/groups/public/---dgreports/---stat/documents/publication/wcms\_422451.pdf</u>

Chart 4: Unemployed category and duration of unemployment, April 2024 and May 2024

During the month, the youth unemployment rate aged **15 to 24 years** edged down by **0.1 percentage points** to **10.5 per cent**, registering **305.6 thousand unemployed youths** (April 2024: 10.6%; 305.9 thousand persons). Meanwhile, the unemployment rate among youth aged **15 to 30 years** was unchanged at **6.5 per cent**, with **434.6 thousand unemployed youths** (April 2024: 6.5%; 434.9 thousand persons) [Chart 5].

Chart 5: Unemployment rate by selected age groups, 1982 - 2022 and January 2021 - May 2024

## LFPR remained at 70.3 per cent in May 2024

The number of **labour force** in May 2024 strengthened further by **0.1 per cent (+23.8 thousand persons)** to record **17.15 million persons** (April 2024: 17.12 million persons). May's **labour force participation rate (LFPR)** remained at **70.3 per cent**, as recorded last month. Based on the seasonally adjusted estimates, the number of labour force increased by 0.2 per cent, recording 70.3 per cent of the LFPR.

Comparing with the same month of the previous year, the number of labour force rose by 1.7 per cent or equivalent to 281.8 thousand persons (May 2023: 16.86 million persons). In terms of rate, the LFPR increased by 0.3 percentage points as compared to May 2023 (70.0%) [Chart 6].

During the month, the number of labour force for both **males** and **females** increased, with the number of **male labour force** reaching **10.48 million persons** (April 2024: 10.47 million persons). Meanwhile, the number of **female labour force** was **6.67 million persons** compared to the previous month (April 2024: 6.66 million persons). As for the LFPR, both **males** and **females LFPR** stood at **83.2 per cent** and **56.6 per cent**, respectively.

On a year-on-year basis, both the male and female labour force were in an upward trend, with a rise of 1.7 per cent and 1.6 per cent, respectively (May 2023: 10.30 million persons; 6.56 million persons). As for the LFPR, male LFPR showed a rise of 0.3 percentage points as compared to 82.9 per cent, while female LFPR climbed by 0.4 percentage points as compared to 56.2 per cent in May 2023 **[Chart 7]**.

The number of persons **outside the labour force** posted a marginal decrease of **0.003 per cent** or **0.2 thousand persons** to **7.23 million persons** in May 2024 (April 2024: 7.23 million persons). On an annual basis, the number of outside labour force continued to increase by 0.1 per cent from 7.23 million persons in May last year. The major composition of the outside labour force was **housework/ family responsibilities**, accounting for **42.7 per cent**, followed by the **schooling/ training** category **(41.4%) [Chart 8]**.

## Chart 8: Share of outside labour force by reasons for not seeking work, April 2024 and May 2024

## **6** LOOKING AHEAD

The challenging external environment has not stopped the Malaysian economy from continuing to grow. This is reflected in the performance of the Gross Domestic Product (GDP) in the first quarter of 2024, which is growing faster than in developed and regional countries<sup>3</sup>. This encouraging performance was supported by the positive growth momentum of the labour market, which recorded a low unemployment rate of 3.3 per cent compared to the same period last year, as well as domestic tourism, which continued to record an increase in tourist arrivals and the country's inflation rate, which remained low.

In addition, the performance of the country's leading index also continued to improve, signalling that the Malaysian economy is expected to experience sustained growth in the near term. Moreover, Malaysia's investment performance also showed a double-digit increase in the total value of approved investments in the first quarter of 2024 compared to the previous year, reflecting investors' confidence in Malaysia<sup>4</sup>. Following this, this situation is expected to create various new job opportunities, including high-skilled jobs, for the people, based on 5,101 projects approved in 2023, which is expected to generate 127,000 new jobs, especially for youths who have just completed schooling and post-graduate education.

Thus, as economic and business activities continue to flourish, it has contributed to the creation of more jobs and income opportunities in the economy, which will encourage more labour participation in the

<sup>&</sup>lt;sup>3</sup> https://api.bharian.com.my/berita/nasional/2024/06/1263953/kdnk-catat-pertumbuhan-kukuh-42-peratus-suku-pertama-2024

<sup>&</sup>lt;sup>4</sup> https://www.sinarharian.com.my/article/671067/bisnes/malaysia-luluskan-pelaburan-rm837-bilion-pada-suku-pertama-2024 https://www.sinarharian.com.my/article/671067/bisnes/malaysia-luluskan-pelaburan-rm837-bilion-pada-suku-pertama-2024

market. In addition, the strategies and measures under the New Industrial Master Plan 2030 (NIMP 2030), the National Energy Transition Roadmap (NETR) 2030 and the Mid-Term Review of the Twelfth Malaysia Plan (MTR of the 12MP) based on the MADANI Economic Framework, will lead to quality investments in high-value-added industries, especially the energy, digital and advanced technology transition industries, thereby creating more high-income job opportunities for the people and sustainable economic growth.

Therefore, the labour market is expected to remain on a stable path in the upcoming months, backed by favourable economic growth, a growing domestic economic position, as well as the recovery of the external sector.

# TABLES

## LABOUR FORCE, MALAYSIA MAY 2024

This page is deliberately left blank

## Table A: Principal statistics of the labour force, Malaysia, 1982 - 2022

				('000)			(%)
Time Series	Labour Force	Employed	Unemployed	Outside Labour Force	Labour Force Participation Rate	Employment to Population Ratio	Unemployment Rate
1982	5,431.4	5,249.0	182.4	2,944.6	64.8	62.7	3.4
1983	5,671.8	5,457.0	214.9	2,969.4	65.6	63.2	3.8
1984	5,862.5	5,566.7	295.8	3,119.6	65.3	62.0	5.0

Notes:

## <sup>1</sup>For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

- A: Agriculture, forestry, livestock and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas and water
- E: Construction
- F: Wholesale and retail trade, restaurants and hotels
- G: Transport, storage and communications
- H: Finance, insurance, real estate and business services
- I: Community, social and personal services

#### <sup>2</sup>For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows: A: Agriculture, hunting and forestry

- B: Fishing
- **C**: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N: Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

- <sup>3</sup>For 2010 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:
- A: Agriculture, forestry and fishing
- B: Mining and quarrying
- C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities
- F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional, scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers

Notes:

#### <sup>1</sup>For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

A: Agriculture, forestry, livestock and fishing

B: Mining and quarrying

C: Manufacturing

D: Electricity, gas and water

E: Construction

F: Wholesale and retail trade, restaurants and hotels

G: Transport, storage and communications

H: Finance, insurance, real estate and business services

I: Community, social and personal services

#### <sup>2</sup>For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

- A: Agriculture, hunting and forestry
- B: Fishing
- C: Mining and quarrying
- D: Manufacturing
- E: Electricity, gas and water supply
- F: Construction
- G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
- H: Hotels and restaurants
- I: Transport, storage and communications
- J: Financial intermediation
- K: Real estate, renting and business activities
- L: Public administration and defence; compulsory social security
- M: Education
- N. Health and social work
- O: Other community, social and personal service activities
- P: Private households with employed persons

#### <sup>3</sup>For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

- A: Agriculture, forestry and fishing
- B: Mining and quarrying C: Manufacturing
- D: Electricity, gas, steam and air conditioning supply
- E: Water supply; sewerage, waste management and remediation activities F: Construction
- G: Wholesale and retail trade, repair of motor vehicles and motorcycles
- H: Transportation and storage
- I: Accommodation and food service activities
- J: Information and communication
- K: Financial and insurance/takaful activities
- L: Real estate activities
- M: Professional, scientific and technical activities
- N: Administrative and support service activities
- O: Public administration and defence; compulsory social security
- P: Education
- Q: Human health and social work activities
- R: Arts, entertainment and recreation
- S: Others service activities
- T: Activities of households as employers
- 'Revised

<sup>4</sup>For year 2011-2019, 2021 and 2022, total includes 'Activities of extraterritorial organizations and bodies'
