FEBRUARY 2025

Announcement

ASEAN-Malaysia 2025 Chairmanship: Department of Statistics Malaysia (DOSM) will chair the 15th ASEAN Community Statistical System Committee (ACSS15) which aim to strengthen the statistical cooperation towards sustainable regional development.

The Government of Malaysia has declared October 20th as National Statistics Day (MyStats Day), with the theme 'Statistics is the Essence of Life.' Meanwhile, the Fourth World Statistics Day will be celebrated on 20 October 2025, with the theme 'Driving Change with Quality Statistics and Data for Everyone'.

OpenDOSM NextGen is a medium that provides data catalogue and visualisations to facilitate users' analysis and can be accessed through <https://open.dosm.gov.my>.

PREFACE

The monthly Labour Force Report, Malaysia, presents the statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS) through a household approach. The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for February 2025 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events. In addition, annual changes from the same month of the previous year are also reported.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

GLOSSARY

Actively unemployed	:	Persons who were available for work and were actively looking for a job during the reference week.
Category of skills	:	For reporting purposes, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as below: <p>Skilled workers:</p> <ol style="list-style-type: none"> 1. Managers; 2. Professionals; and 3. Technicians and associate professionals. <p>Semi-skilled workers:</p> <ol style="list-style-type: none"> 4. Clerical support workers; 5. Services and sales workers; 6. Skilled agricultural, forestry, livestock, and fishery workers; 7. Craft and related trades workers; and 8. Plant and machine operators and assemblers. <p>Low-skilled workers:</p> <ol style="list-style-type: none"> 9. Elementary occupations. <p>Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with the addition of group 0 - Armed Forces occupations.</p>
Economic activity	:	Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors: Agriculture, Mining & quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into sub-sectors.
Employed	:	All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker or unpaid family worker.
Employee	:	A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.
Employer	:	A person who operates a business, a plantation or other trade and employs one or more workers to help him.
Employment-to-population ratio	:	The proportion of the employed population to working-age population.
Inactively unemployed	:	Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and were waiting for the result of job applications.

GLOSSARY

Labour force participation rate	:	The ratio of the labour force to the working-age population, expressed as a percentage.
Outside labour force	:	All persons not classified as employed or unemployed are classified as outside the labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.
Own-account worker	:	A person who operates his own farm, business or trade without employing any paid workers to conduct his farm, trade or business.
Skill-related underemployment	:	Those with tertiary education and working in the semi-skilled and low-skilled categories.
Time-related underemployment	:	A group of people who were employed less than 30 hours per week during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours per week during the reference week are considered to be in full employment.
Unemployed	:	Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.
Unemployment rate	:	The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.
Unpaid family worker	:	A person who works without pay or wages on a farm, business or trade operated by another member of the family.

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI).

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization (ILO).

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjustment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

EXPLANATORY NOTES

Starting with the release of Labour Force Statistics (LFS), January 2025, the principal statistics of the labour force are estimated based on the current population estimates of Malaysia.

The revision of the LFS data series is performed when the most recent Population and Housing Census data of 2020 is available. This census data is then used for the revision of the LFS data series to include additional information available from the latest Population and Housing Census. This process of incorporating revised population benchmarks is referred to as rebasing. On the same note, revisions are carried out on LFS data for January to December 2024 in stages beginning with January, February and December data.

KEY REVIEWS

- The number of **employed persons** continued to show improvement in February 2025, increasing by **0.3 per cent (+49.7 thousand persons)** to **16.73 million persons** (January 2025: 16.68 million persons). The **employment-to-population ratio**, which indicates the ability of an economy to create employment, was unchanged at **68.5 per cent** as in the preceding month.
- In terms of economic sector, most of the employed persons were concentrated in the Services sector, largely in Accommodation and food & beverage services; Wholesale & retail trade; and Information & communication activities. A similar trend of employment was also observed in the Manufacturing, Construction, and Agriculture sectors, while the number of employed persons in the Mining & quarrying sector decreased.
- The **employees'** category comprised **75.2 per cent** of the total employed persons in February 2025, registering an increase of **0.2 per cent (+27.2 thousand persons)** to **12.59 million persons** (January 2025: 12.56 million persons). On the same note, the number of **own-account workers** also edged up by **0.6 per cent (+19.6 thousand persons)** to **3.13 million persons** (January 2025: 3.11 million persons).
- During the month, the number of **unemployed persons** fell by **0.2 per cent (-1.0 thousand persons)** from 533.8 thousand persons in January 2025 to **532.8 thousand persons** in February 2025. February's **unemployment rate** held steady at **3.1 per cent** as in the prior month.
- In February 2025, the number of **labour force** continued to expand with a rise of **0.3 per cent (+48.7 thousand persons)** to **17.27 million persons** (January 2025: 17.22 million persons). A higher **labour force participation rate (LFPR)** was recorded during the month at **70.7 per cent**, an increase of **0.1 percentage points** from 70.6 per cent in the previous month.
- The number of persons **outside the labour force** in February 2025 posted a marginal decrease of **0.02 per cent (-1.7 thousand persons)** to **7.15 million persons** (January 2025: 7.15 million persons). The main reason for being outside the labour force was due to **housework/ family responsibilities**, comprising **43.7 per cent**, followed by **schooling/ training** reasons at **41.6 per cent**.
- The Malaysian economy is expected to remain resilient, supported by continued progress in long-term projects, increased household income and the easing of global monetary conditions. Furthermore, the country's diversified economic structure and supportive policies have positively influenced the country's labour market position during the month. The government also has implemented reforms to enhance workforce inclusivity, reduce reliance on foreign labour, and promote automation and mechanisation. These measures aim to create high-quality employment opportunities and improve productivity. Thus, Malaysia's labour market outlook appears promising in the upcoming months, supported by robust policies and investments in high-growth and high-value (HGHV) industries.

1 INTRODUCTION

THE COUNTRY'S LABOUR FORCE POSITION REMAINS STABLE IN FEBRUARY 2025, CONFORMING TO THE ENCOURAGING CURRENT ECONOMIC DEVELOPMENTS

The Malaysian economy was in a stable and growing position in February 2025. In accordance with this situation, the country's labour force continued to show a better performance during the month, supported by an improved economic and business outlook. As the economy continued to thrive, it encouraged businesses to expand, offering more job opportunities for the job seekers. These opportunities have driven the ongoing demand for labour to support the industry's operational capacity. As a result, it has energised the labour market and encouraged more individuals to enter the market.

Furthermore, Malaysia's economy also demonstrated resilience, supported by robust export demand, which further strengthened the nation's labour force in February 2025. Hong Leong Investment Bank Bhd. (HLIB Research) had stated that Malaysia's growth was sustained, driven by continued expansion in the Services sector and Manufacturing, supported by resilient consumer demand, robust investment activity, and continued growth in electrical and electronics (E&E) exports¹. Hence, many industries took the opportunity to enlarge their production to meet the export demand, especially in E&E products.

The robust demand for E&E products has proven to be a key driver for job creation in Malaysia, both in the direct Manufacturing and ancillary sectors, and contributes to the country's skilled workforce. The expanding E&E sector is creating both blue-collar and white-collar jobs, driving economic growth through technological innovation and digital transformation. Therefore, Malaysia's labour force benefits greatly from the technological advances, as well as crafting the country to be more competitive in the global economy while addressing the evolving needs of modern industries. Thus, the country's labour force position remains stable in February 2025, conforming to the encouraging current economic developments.

In the meantime, Malaysia's Leading Index (LI) rose by 0.4 per cent year-on-year, to 112.5 points in January 2025 (January 2024: 112.1 points), maintaining its positive growth for fourteen consecutive months. Meanwhile, the monthly performance of LI showed a decrease of 1.2 per cent in January 2025. Based on the smoothed long-term trend in January 2025, the smoothed growth rate of the LI for January 2025 remained below 100.0 points, anticipating modest economic growth prospects, bolstered by resilient domestic demand despite a challenging international market. As for the monthly external trade indicators in February 2025 for exports and imports, both registered month-on-month decline of 3.7 per cent (January 2025: -11.3%) and -11.3 per cent (January 2025: -0.2%), respectively.

2 EMPLOYED PERSONS

The number of employed persons continued to show improvement in February 2025

The number of **employed persons** continued to show improvement in February 2025, increasing by **0.3 per cent (+49.7 thousand persons)** to **16.73 million persons** (January 2025: 16.68 million persons). In terms of seasonally adjusted data, the number of employed persons rose by 0.5 per cent. On an annual basis, the employed persons ascended by 2.9 per cent or the equivalent of 468.3 thousand persons (February^r 2024: 16.27 million persons).

¹ <https://www.nst.com.my/business/economy/2025/02/1176067/malaysias-economy-solid-amid-global-headwinds-say-analysts>

In terms of economic sector, most of the employed persons were concentrated in the Services sector, largely in Accommodation and food & beverage services; Wholesale & retail trade; and Information & communication activities. A similar trend of employment was also observed in the Manufacturing, Construction, and Agriculture sectors, while the number of employed persons in the Mining & quarrying sector decreased.

The **employment-to-population ratio**, which indicates the ability of an economy's capacity to create employment, was unchanged at **68.5 per cent** as in the preceding month. As compared to the same month one year prior, the ratio rose by 0.3 percentage points from 68.2 per cent in February[†] 2024 [Chart 1].

Chart 1: Employed persons and employment-to-population ratio, January[†] 2024, February[†] 2024, December[†] 2024, January 2025 and February 2025

Note: [†] Revision based on the current population estimates from Population and Housing Census 2020

The **employees'** category comprised **75.2 per cent** of the total employed persons in February 2025, registering an increase of **0.2 per cent (+27.2 thousand persons)** to **12.59 million persons** (January 2025: 12.56 million persons). On the same note, the number of **own-account workers** also edged up by **0.6 per cent (+19.6 thousand persons)** to **3.13 million persons** (January 2025: 3.11 million persons). This category primarily comprised daily wage earners working in small business operators, such as retailers, hawkers, market and stall vendors, as well as smallholders [Chart 2].

Chart 2: Employed person by status in employment, January 2025 and February 2025

Note: [†] Revision based on the current population estimates from Malaysia Population and Housing Census 2020

The number of **employed persons who were temporarily not working** reduced to **85.4 thousand persons** in February 2025, marking a **4.3 per cent** decrease or the equivalent of

3.9 thousand persons (January 2025: 89.3 thousand persons). Annually, the number climbed by 1.2 per cent (+1.0 thousand persons) from 84.4 thousand persons in February[†] 2024. This group comprises individuals who were temporarily unable to work but were not classified as unemployed, as they had jobs to return to.

3 UNEMPLOYMENT

February's unemployment rate held steady at 3.1 per cent

During the month, the number of **unemployed persons** fell by **0.2 per cent (-1.0 thousand persons)** from 533.8 thousand persons in January 2025 to **532.8 thousand persons** in February 2025. February's **unemployment rate** held steady at **3.1 per cent** as in the prior month. Based on seasonally adjusted terms, the number of unemployed persons decreased by 0.3 per cent, resulting in a 3.1 per cent unemployment rate.

Year-on-year, the number of unemployed persons was also on a declining trend, with a reduction of 4.3 per cent (-24.1 thousand persons) as compared to 556.9 thousand persons in February[†] 2024. Subsequently, the unemployment rate decreased by 0.2 percentage points from the 3.3 per cent registered in the same month last year [**Chart 3**].

Chart 3: Unemployed and unemployment rate, January[†] 2024, February[†] 2024, December[†] 2024, January 2025 and February 2025

Note: [†] Revision based on the current population estimates from Malaysia Population and Housing Census 2020

By unemployment category, **79.3 per cent** of the total unemployed persons in February 2025 were those who were actively seeking jobs or the **actively unemployed**. This category edged down by **0.2 per cent (-0.8 thousand persons)** to **422.7 thousand persons** (January 2025: 423.6 thousand persons). Among the actively unemployed, **63.7 per cent** were those who were **unemployed for less than three months**, while those who had been **unemployed for more than a year²** comprised **5.6 per cent** [**Chart 4**].

Likewise, the **inactively unemployed**, or those who believed that no jobs were available, decreased further with a reduction of **0.1 per cent (-0.1 thousand persons)** to record **110.1 thousand persons** (January 2025: 110.2 thousand persons).

² Referring to a person who has been unemployed for one year or longer (Source: KILM: Long-term unemployment)

Chart 4: Unemployed category and duration of unemployment for the actively unemployed, January 2025 and February 2025

Note: † Revision based on the current population estimates from Malaysia Population and Housing Census 2020

During the month, the youth unemployment rate for those aged **15 to 24 years** stood at **10.3 per cent**, registering **298.9 thousand unemployed youths** (January 2025: 10.3%; 299.3 thousand persons). On the same note, the unemployment rate among youth aged **15 to 30 years** remained at **6.3 per cent**, with **401.6 thousand unemployed youths** (January 2025: 6.3%; 402.4 thousand persons) [Chart 5].

Chart 5: The number of unemployed persons and unemployment rate by selected age groups, January† 2024, February† 2024, December† 2024, January 2025 and February 2025

Note: † Revision based on the current population estimates from Malaysia Population and Housing Census 2020

4 LABOUR FORCE

A higher LFPR was recorded in February 2025 at 70.7 per cent

In February 2025, the number of **labour force** continued to expand with a rise of **0.3 per cent (+48.7 thousand persons)** to **17.27 million persons** (January 2025: 17.22 million persons). A higher **labour force participation rate (LFPR)** was recorded during the month at **70.7 per cent**, an increase of **0.1 percentage points** from 70.6 per cent in the previous month. In terms of seasonally adjusted data, the labour force went up by 0.3 per cent, with the LFPR of 70.7 per cent.

Year-on-year, the number of labour force increased by 2.6 per cent, or the equivalent of 444.3 thousand persons, compared to the same month of the previous year (February^r 2024: 16.82 million persons). Consequently, the LFPR rose by 0.2 percentage points from 70.5 per cent in February^r 2024 [Chart 6].

Chart 6: Labour force and LFPR, January^r 2024, February^r 2024, December^r 2024, January 2025 and February 2025

Note: ^r Revision based on the current population estimates from Population and Housing Census 2020

Both male and female labour forces registered increases in February 2025. The **male labour force** rose to **10.87 million persons** from 10.84 million persons in January 2025, while the **female labour force** ascended to **6.40 million persons** compared to 6.38 million persons in the previous month. In terms of LFPR, the **male LFPR** remained unchanged at **83.2 per cent** as in last month, while the **female LFPR** increased by **0.1 percentage points** to **56.3 per cent** (January 2025: 56.2%).

On an annual basis, the male labour force enlarged by 3.4 per cent, compared to 10.51 million persons in February^r 2024. Meanwhile, the female labour force increased by 1.3 per cent from 6.32 million persons in February^r last year. Accordingly, the male LFPR rose by 0.1 percentage points from 83.1 per cent, while the female LFPR remained at 56.3 per cent as in February^r 2024 [Chart 7].

Chart 7: Labour force and LFPR by sex, January^r 2024, February^r 2024, December^r 2024, January 2025 and February 2025

Note: ^r Revision based on the current population estimates from Population and Housing Census 2020

5 OUTSIDE LABOUR FORCE

The main reason for being outside the labour force was due to housework/ family responsibilities

The number of persons **outside the labour force** in February 2025 posted a marginal decrease of **0.02 per cent (-1.7 thousand persons)** to **7.15 million persons** (January 2025: 7.15 million persons). Year-on-year, the number of persons outside the labour force increased by 1.6 per cent (+114.1 thousand persons) from 7.04 million persons in February⁷ 2024. The main reason for being outside the labour force was due to **housework/ family responsibilities**, comprising **43.7 per cent**, followed by **schooling/ training** reasons at **41.6 per cent** [Chart 8].

Chart 8: Share of outside labour force by reasons for not seeking work, January 2025 and February 2025

Note: ⁷ Revision based on the current population estimates from Malaysia Population and Housing Census 2020

6 LOOKING AHEAD

The Malaysian economy is expected to remain resilient, supported by continued progress in long-term projects, increased household income and the easing of global monetary conditions. The Gross Domestic Product (GDP) is projected to grow between 4.5 per cent and 5.5 per cent this year, supported by strong domestic demand and ongoing multi-year projects³. Inflation remains manageable, with rates expected to register a range from 2.0 per cent to 3.5 per cent.

The continuous creation of multi-year projects as well as business-friendly policies and incentives aimed at key sectors such as technology, tourism, and export-oriented businesses will probably increase investment activity⁴. Apart from that, the key initiatives, for example, the National Energy Transition Roadmap (NETR) and New Industrial Master Plan (NIMP) 2030, are expected to stimulate medium-term investment.

Therefore, Malaysia's diversified economic structure and supportive policies have positively influenced the country's labour market position during the month. The government also has implemented reforms to enhance workforce inclusivity, reduce reliance on foreign labour, and promote automation and mechanisation. These measures aim to create high-quality employment opportunities and improve productivity.

⁴ <https://www.thestar.com.my/business/business-news/2025/03/25/malaysia039s-economic-growth-to-remain-resilient-in-2025---rhb-b>

Additionally, policies such as wage adjustments for civil servants and minimum wage increases have contributed to favourable labour market conditions. Investment in education and industry under the 12th Malaysia Plan is expected to generate new jobs and address wage stagnation⁵.

While challenges such as skills mismatches persist, Malaysia's strategic focus on innovation-driven industrial policies and labour market flexibility is fostering a dynamic and competitive workforce⁶. Efforts to address skills mismatches and promote digitalisation are expected to enhance labour productivity. Initiatives such as upskilling programmes and targeted incentives are likely to further boost workforce adaptability and efficiency. Thus, Malaysia's labour market outlook appears promising in the upcoming months, supported by robust policies and investments in high-growth and high-value (HGHV) industries.

Note:

The monthly Labour Force Survey (LFS) indicators are still using the estimated population data of the Malaysia Population and Housing Census, 2010.

Table C4(i): Employed person by status in employment, January^f 2024, February^f 2024, December^f 2024, January 2025 and February 2025

('000)

Time Series	Employer	Employees	Own account workers	Unpaid family worker
2024				
January ^f	535.5	12,231.9	3,010.0	452.0
February ^f	540.6	12,249.4	3,024.8	450.9
December ^f	545.8	12,528.1	3,086.6	469.4
2025				
January	547.0	12,560.1	3,108.2	469.1
February	550.8	12,587.3	3,127.8	468.2

Notes:

- ^f Revision based on the current population estimates from Population and Housing Census 2020
- Starting with the release of Labour Force Statistics (LFS), January 2025, the principal statistics of the labour force are estimated based on the current population estimates of Malaysia

Notes:

1. Labour Force Survey indicators for 2019 and previously still using the estimated population data of the Malaysia Population and Housing Census, 2010

2. ¹For 1982- 2000, category of occupation are classified according to the "Dictionary of Occupational Classification, 1980" as follows:

- 1: Professional, technical and related workers
- 2: Administrative and managerial workers
- 3: Clerical and related workers
- 4: Sales workers
- 5: Service workers
- 6: Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7: Production and related workers, transport equipment operators and labourers

3. ²For 2001 - 2010, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 1998" as follows:

- 1: Legislators, senior officials and managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical workers
- 5: Service workers and shop and market sales workers
- 6: Skilled agricultural and fishery workers
- 7: Craft and related trade workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

4. ³For 2011 - 2015, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2008" as follows:

- 1: Managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical support workers
- 5: Service workers and shop and market sales workers
- 6: Skilled agricultural, forestry and fishery workers
- 7: Craft and related trades workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

5. ⁴For 2016 - 2021, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2013" as follows:

- 1: Managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical workers
- 5: Service and sales workers
- 6: Skilled agricultural, forestry, livestock and fishery workers
- 7: Craft and related trades workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

6. ⁵For 2022 onwards, categories of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2020"7. ^f Revision based on the current population estimates from Population and Housing Census 2020

Notes:

1. Labour Force Survey indicators for 2019 and previously still using the estimated population data of the Malaysia Population and Housing Census, 2010

2. ¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

A: Agriculture, forestry, livestock and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas and water
 E: Construction
 F: Wholesale and retail trade, restaurants and hotels
 G: Transport, storage and communications
 H: Finance, insurance, real estate and business services
 I: Community, social and personal services

3. ²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

A: Agriculture, hunting and forestry
 B: Fishing
 C: Mining and quarrying
 D: Manufacturing
 E: Electricity, gas and water supply
 F: Construction
 G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
 H: Hotels and restaurants
 I: Transport, storage and communications
 J: Financial intermediation
 K: Real estate, renting and business activities
 L: Public administration and defence; compulsory social security
 M: Education
 N: Health and social work
 O: Other community, social and personal service activities
 P: Private households with employed persons

4. ³For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

A: Agriculture, forestry and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas, steam and air conditioning supply
 E: Water supply; sewerage, waste management and remediation activities
 F: Construction
 G: Wholesale and retail trade, repair of motor vehicles and motorcycles
 H: Transportation and storage
 I: Accommodation and food service activities
 J: Information and communication
 K: Financial and insurance/takaful activities
 L: Real estate activities
 M: Professional, scientific and technical activities
 N: Administrative and support service activities
 O: Public administration and defence; compulsory social security
 P: Education
 Q: Human health and social work activities
 R: Arts, entertainment and recreation
 S: Other service activities
 T: Activities of households as employers

5. ⁴For year 2011-2019 & 2021-2023, total includes 'Activities of extraterritorial organizations and bodies'6. [†] Revision based on the current population estimates from Population and Housing Census 2020

Table E: Employed person by industry, Malaysia, 1982 - 2023 (cont'd)

('000)

Notes:

1. Labour Force Survey indicators for 2019 and previously still using the estimated population data of the Malaysia Population and Housing Census, 2010

2. ¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

A: Agriculture, forestry, livestock and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas and water
 E: Construction
 F: Wholesale and retail trade, restaurants and hotels
 G: Transport, storage and communications
 H: Finance, insurance, real estate and business services
 I: Community, social and personal services

3. ²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

A: Agriculture, hunting and forestry
 B: Fishing
 C: Mining and quarrying
 D: Manufacturing
 E: Electricity, gas and water supply
 F: Construction
 G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
 H: Hotels and restaurants
 I: Transport, storage and communications
 J: Financial intermediation
 K: Real estate, renting and business activities
 L: Public administration and defence; compulsory social security
 M: Education
 N: Health and social work
 O: Other community, social and personal service activities
 P: Private households with employed persons

4. ³For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

A: Agriculture, forestry and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas, steam and air conditioning supply
 E: Water supply; sewerage, waste management and remediation activities
 F: Construction
 G: Wholesale and retail trade, repair of motor vehicles and motorcycles
 H: Transportation and storage
 I: Accommodation and food service activities
 J: Information and communication
 K: Financial and insurance/takaful activities
 L: Real estate activities
 M: Professional, scientific and technical activities
 N: Administrative and support service activities
 O: Public administration and defence; compulsory social security
 P: Education
 Q: Human health and social work activities
 R: Arts, entertainment and recreation
 S: Others service activities
 T: Activities of households as employers

5. ⁴For year 2011-2019 & 2021-2023, total includes 'Activities of extraterritorial organizations and bodies'6. ⁵ Revision based on the current population estimates from Population and Housing Census 2020
